FUND SUMMARY

Investment Objective: The Holbrook Income Fund (the “Fund”) seeks to provide current income, with a secondary objective of capital preservation in a rising interest rate environment.

Fees and Expenses of the Fund: This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below. You may qualify for sales charge discounts on purchases of Class A shares if you and your family invest, or agree to invest in the future, at least \$100,000 in the Fund. More information about these and other discounts is available from your financial intermediary and in the section entitled How to Purchase Shares on page 20 of the Fund’s Prospectus and in the Statement of Additional Information (“SAI”).

Shareholder Fees (fees paid directly from your investment)	Class A	Class I	Investor Class
Maximum Sales Charge (Load) Imposed on Purchases (as a % of offering price)	1.25%	None	None
Maximum Deferred Sales Charge (Load) (as a % of original purchase price)	None	None	None
Maximum Sales Charge (Load) Imposed On Reinvested Dividends and other Distributions	None	None	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)			
Management Fees	0.80%	0.80%	0.80%
Distribution and Service (12b-1) Fees	0.25%	None	0.50%
Other Expenses	0.33%	0.33%	0.33%
Acquired Fund Fees and Expenses ⁽¹⁾	0.01%	0.01%	0.01%
Total Annual Fund Operating Expenses ⁽²⁾	1.39%	1.14%	1.64%

(1) Acquired Fund Fees and Expenses are expenses incurred indirectly by the Fund through its ownership of shares in other investment companies.

(2) The operating expenses in this fee table do not correlate to the expense ratios in the Financial Highlights because the expense ratios in the Financial Highlights do not reflect Acquired Fund Fees and Expenses.

Example: This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based upon these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Class A	\$265	\$560	\$876	\$1,773
Class I	\$116	\$362	\$628	\$1,386
Investor Class	\$167	\$517	\$892	\$1,944

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund’s performance. For the fiscal year ended April 30, 2021, the Fund’s portfolio turnover rate was 74%.

Principal Investment Strategies: The Fund normally invests at least 80% of its net assets, including any borrowings for investment purposes, in a diversified portfolio of fixed income instruments. In seeking to achieve its investment objective, the Fund will allocate up to 100% of its portfolio in fixed income securities through direct investments or through the purchase of closed end investment companies and exchange-traded funds (together, the “Underlying Funds”) that invest primarily in income producing securities.

In managing the Fund’s portfolio, the Adviser seeks to protect principal in a rising interest rate environment, although there is no guarantee that this strategy will succeed.

Using a top down asset allocation model, the Fund may invest all or a portion of its assets in fixed-income securities such as corporate bonds, preferred securities, convertible securities, treasury inflation protected securities (“TIPS”) and collateralized loan obligations (“CLOs”). The Fund may also invest in senior notes issued by business development companies (also known as “baby bonds”). The Adviser may also allocate up to 50% of the Fund’s assets in the common and preferred stock of Underlying Funds. The Fund may invest directly or indirectly in fixed income securities of any maturity or quality, including investing up to 50% of the Fund’s assets in securities rated below investment grade (securities rated below BBB by Standard & Poor’s (“S&P”) and Baa3 by Moody’s Investor Services, Inc. (“Moody’s”) and are often referred to as “high yield” or “junk bonds”). The Fund may invest without limit in U.S. and non-U.S. dollar denominated securities of U.S. and foreign issuers, including issuers located in emerging market countries. The Fund may invest in fixed income instruments with fixed or adjustable (floating) rates.

The Adviser uses macro-economic projections, fundamental company and industry analysis, and technical analysis of individual issuers to strategically position the Fund, making tactical adjustments as investing conditions change. The Fund seeks target allocations in multiple sectors and will typically hold approximately 70% of its assets in investment grade fixed income securities, directly or through one or more Underlying Funds that predominantly hold investment grade securities, although the amount may be higher or lower depending on market conditions. When selecting underlying securities, the Adviser considers a number of factors, including fundamental and technical analysis to assess the relative risk and reward potential. The Adviser will invest in closed end funds to take advantage of pricing discrepancies in the closed end fund market. The Adviser performs both a quantitative and qualitative analysis of closed end funds prior to any closed end fund being added to the Fund’s portfolio. This analysis and the Adviser’s proprietary computer trading programs help determine when to buy and sell the closed end funds in the Fund’s portfolio. The Fund will sell a portfolio holding when the security no longer meets its investment criteria or when a more attractive investment is available.

The Fund may, when market signals warrant, go defensive, investing all or a substantial portion of Fund assets in cash and/or cash equivalents. The Fund may also, at times, use derivatives, including but not limited to futures, options, credit default swaps, total return swaps and repurchase agreements, as a substitute for making direct investments in underlying investments, to reduce certain exposure or to “hedge” against market volatility and other risks.

Principal Investment Risks: As with all mutual funds, there is the risk that you could lose money through your investment in the Fund. An investment in the Fund is not guaranteed to achieve its investment objective; is not a deposit with a bank; is not insured, endorsed or guaranteed by the Federal Deposit Insurance Corporation or any other government agency; and is subject to investment risks. The value of your investment in the Fund, as well as the amount of return you receive on your investment, may fluctuate significantly. You may lose part or all of your investment in the Fund or your investment may not perform as well as other similar investments. The Fund is not intended to be a complete investment program but rather one component of a diversified investment portfolio. Many factors affect the Fund’s net asset value and performance. Each risk summarized below is a principal risk of investing in the Fund and different risks may be more significant at different times depending upon market conditions or other factors.

The Fund may be subject to the risks described below through its own direct investments and indirectly through investments in the Underlying Funds.

As with any fund, there is no guarantee that the Fund achieve its goal.

- *Market Risk.* Overall market risk may affect the value of individual instruments in which the Fund invests. The Fund is subject to the risk that the securities markets will move down, sometimes rapidly and unpredictably, based on overall economic conditions and other factors, which may negatively affect the Fund’s performance. Factors such as domestic and foreign (non-U.S.) economic growth and market conditions, real or perceived adverse economic or political conditions, inflation, changes in interest rate levels, lack of liquidity in the bond or other markets, volatility in the equities or other securities markets or adverse investor sentiment and political events affect the securities markets. Securities markets also may experience long periods of decline in value. When the value of the Fund’s investments goes down, your investment in the Fund decreases in value and you could lose money.

Local, state, regional, national or global events such as war, acts of terrorism, the spread of infectious illness or other public health issues, recessions, or other events could have a significant impact on the Fund and its investments and could result in decreases to the Fund’s net asset value. Political, geopolitical, natural and other events, including war, terrorism, trade disputes, government shutdowns, market closures, natural and environmental disasters, epidemics, pandemics and other public health crises and related events and governments’ reactions to such events have led, and in the future may lead, to economic uncertainty, decreased economic activity, increased market volatility and other disruptive effects on U.S. and global economies and markets. Such events may have significant adverse direct or indirect effects on the Fund and its investments. For example, a widespread health crisis such as a global pandemic could cause substantial market volatility, exchange trading suspensions and closures, impact the ability to complete redemptions, and affect Fund performance. A health crisis may exacerbate other pre-existing political, social and economic risks. In addition, the increasing interconnectedness of markets around the world may result in many markets being affected by events or conditions in a single country or region or events affecting a single or small number of issuers.

- *Market Events Risk.* There has been increased volatility, depressed valuations, decreased liquidity and heightened uncertainty in the financial markets during the past several years, including what was experienced in 2020. These conditions are an inevitable part of investing in capital markets and may continue, recur, worsen or spread. The U.S. government and the Federal Reserve, as well as certain foreign governments and central banks, have taken steps to support financial markets, including by keeping interest rates at historically low levels. This and other government intervention may not work as intended, particularly if the efforts are perceived by investors as being unlikely to achieve the desired results. The U.S. government and the Federal Reserve may reduce market support activities. Such reduction, including interest rate increases, could negatively affect financial markets generally, increase market volatility and reduce the value and liquidity of securities in which the Fund invests. Policy and legislative changes in the United States and in other countries may also continue to contribute to decreased liquidity and increased volatility in the financial markets. The impact of these changes on the markets, and the practical implications for market participants, may not be fully known for some time.
- *Management Risk.* The risk that investment strategies employed by the Fund’s adviser in selecting investments for the Fund may not result in an increase in the value of your investment or in overall performance equal to other similar investment vehicles having similar investment strategies. Management risk includes the risk that the quantitative model used by the Adviser may not perform as expected, particularly in volatile markets.
- *Valuation Risk.* The sale price that the Fund could receive for a portfolio security may differ from the Fund’s valuation of the security, particularly for securities that trade in low volume or volatile markets, or that are valued using a fair value methodology. In addition, the value of the securities in the Fund’s portfolio may change on days when shareholders will not be able to purchase or sell the Fund’s shares.
- *Business Development Company (“BDC”) Risk.* BDCs have little or no operating history and may carry risks similar to those of a private equity or venture capital fund. BDC company securities are not redeemable at the option of the shareholder and they may trade in the market at a discount to their net asset value. A significant portion of a BDC’s investments are recorded at fair value as determined by its board of directors, which may create uncertainty as to the value of the BDC’s investments. Non-traded BDCs are illiquid and it may not be possible to redeem shares or to do so without paying a substantial penalty. Publicly traded BDCs usually trade at a discount to their net asset value because they invest in unlisted securities and have limited access to capital markets. BDCs are subject to high failure rates among the companies in which they invest, and federal securities laws impose restraints upon the organization and operations of BDCs that can limit or negatively impact the performance of a BDC.
- *High Yield Risk.* Investment in or exposure to high yield (lower rated or below investment grade) debt instruments (also known as “junk bonds”) may involve greater levels of interest rate, credit, liquidity and valuation risk than for higher rated instruments. High yield debt instruments are considered predominantly speculative and are higher risk than investment grade instruments with respect to the issuer’s continuing ability to make principal and interest payments and, therefore, such instruments generally involve greater risk of default or price changes than higher rated debt instruments. An economic downturn or period of rising interest rates could adversely affect the value of these securities and market for these securities and reduce market liquidity (liquidity risk).
- *Fixed Income Securities Risk.* Fixed income securities are subject to interest rate risk, call risk, prepayment and extension risk, credit risk, duration, and liquidity risk. In addition, current market conditions may pose heightened risks for fixed income securities. When the Fund invests in fixed income securities or derivatives, the value of your investment in the Fund will fluctuate with changes in interest rates. Typically, a rise in interest rates causes a decline in the value of fixed income securities or derivatives owned by the Fund. In general, the market price of fixed income securities with longer maturities or durations will increase or decrease more in response to changes in interest rates than shorter-term securities. Risks associated with rising interest rates are heightened given that interest rates in the U.S. currently remain near historic lows. Other risk factors include credit risk (the debtor may default) and prepayment risk (the debtor may pay its obligation early, reducing the amount of interest payments). These risks could affect the value of a particular investment by the Fund, possibly causing the Fund’s share price and total return to be reduced and fluctuate more than other types of investments. The fixed income securities market can be susceptible to increases in volatility and decreases in liquidity. New regulations applicable to and changing business practices of financial intermediaries that make markets in fixed income securities have resulted in less market making activity for certain fixed income securities, which has reduced the liquidity and may increase the volatility for such fixed income securities. Liquidity may decline unpredictably in response to overall economic conditions or credit tightening. For example, a general rise in interest rates may cause investors to move out of fixed income securities on a large scale, which could adversely affect the price and liquidity of fixed income securities and could also result in increased redemptions for the Fund. Duration risk arises when holding long duration and long maturity investments, which will magnify certain risks, including interest rate risk and credit risk. Effective duration estimates price changes for relatively small changes in rates. If rates rise significantly, effective duration may tend to understate the drop in a security’s price. If rates drop significantly, effective duration may tend to overstate the rise in a security’s price.
- *Baby Bonds Risk.* The primary risk associated with the Fund’s investments in baby bonds is that the issuer or insurer of a baby bond may default on principal and/or interest payments when due on the baby bond. Such a default would have the effect of lessening the income generated by the Fund and/or the value of the baby bonds. Baby bonds are also subject to typical credit ratings risks associated with other fixed-income instruments.

- *Closed End Fund Risk.* The Fund invests in closed end investment companies or funds. The shares of many closed end funds, after their initial public offering, frequently trade at a price per share that is less than the net asset value per share, the difference representing the “market discount” of such shares. This market discount may be due in part to the investment objective of long-term appreciation, which is sought by many closed end funds, as well as to the fact that the shares of closed end funds are not redeemable by the holder upon demand to the issuer at the next determined net asset value, but rather, are subject to supply and demand in the secondary market. A relative lack of secondary market purchasers of closed end fund shares also may contribute to such shares trading at a discount to their net asset value.

The Fund may invest in shares of closed end funds that are trading at a discount to net asset value or at a premium to net asset value. There can be no assurance that the market discount on shares of any closed end fund purchased by the Fund will ever decrease. In fact, it is possible that this market discount may increase and the Fund may suffer realized or unrealized capital losses due to further decline in the market price of the securities of such closed end funds, thereby adversely affecting the net asset value of the Fund’s shares. Similarly, there can be no assurance that any shares of a closed end fund purchased by the Fund at a premium will continue to trade at a premium or that the premium will not decrease subsequent to a purchase of such shares by the Fund.

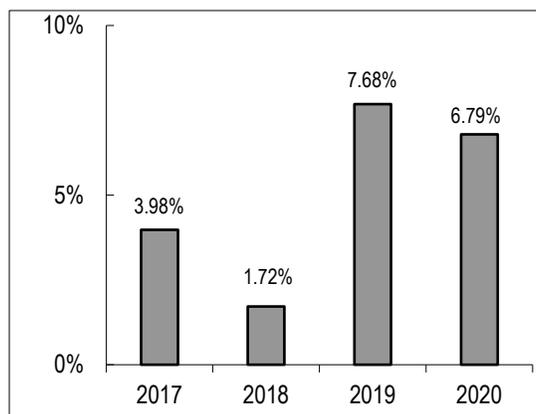

Closed end funds may issue senior securities (including preferred stock and debt obligations) for the purpose of leveraging the closed end fund’s common shares in an attempt to enhance the current return to such closed end fund’s common shareholders. The Fund’s investment in the common shares of closed end funds that are financially leveraged may create an opportunity for greater total return on its investment, but at the same time may be expected to exhibit more volatility in market price and net asset value than an investment in shares of investment companies without a leveraged capital structure.

- *Collateralized Loan Obligations Risk.* The Fund is subject to the following risks as a result of its investments in CLOs:
 - *Asset Manager Risk.* The CLO’s performance is linked to the expertise of the CLO manager and its ability to manage the CLO portfolio. The experience of a CLO manager plays an important role in the rating and risk assessment of CLO debt securities. One of the primary risks to investors of a CLO is the potential change in CLO manager, over which the Fund will have no control.
 - *Legal and Regulatory Risk.* The Fund may be adversely affected by new (or revised) laws or regulations that may be imposed by government regulators or self-regulatory organizations that supervise the financial markets. These agencies are empowered to promulgate a variety of rules pursuant to financial reform legislation in the United States. The Fund may also be adversely affected by changes in the enforcement or interpretation of existing statutes and rules. Changes in the regulation of CLOs may adversely affect the value of the investments held by the Fund and the ability of the Fund to execute its investment strategy.
 - *Limited Recourse Risk.* CLO debt securities are limited recourse obligations of their issuers. CLO debt is payable solely from the proceeds of its underlying assets. Consequently, CLO investors must rely solely on distributions from the underlying assets for payments on the CLO debt they hold. No party or entity other than the issuer will be obligated to make payments on CLO debt. CLO debt is not guaranteed by the issuer or any other party or entity involved in the organization and management of a CLO. If income from the underlying loans is insufficient to make payments on the CLO debt, no other assets will be available for payment.
 - *Redemption Risk.* CLO debt securities may be subject to redemption. For example, certain tranches of CLO debt may be redeemed if the CLO manager is unable to identify assets suitable for investment during the period when it has the ability to reinvest the principal proceeds from the sale of assets, scheduled redemptions and prepayments in additional assets (the “Reinvestment Period”). Additionally, holders of subordinated CLO debt may cause the redemption of senior CLO debt. In the event of an early redemption, holders of the CLO debt being redeemed will be repaid earlier than the stated maturity of the debt. The timing of redemptions may adversely affect the returns on CLO debt.
 - *Reinvestment Risk.* The CLO manager may not find suitable assets in which to invest during the Reinvestment Period or to replace assets that the manager has determined are no longer suitable for investment (for example, if a security has been downgraded by a rating agency). Additionally, the reinvestment period is a pre-determined finite period of time; however, there is a risk that the reinvestment period may terminate early if, for example, the CLO defaults on payments on the securities which it issues or if the CLO manager determines that it can no longer reinvest in underlying assets. Early termination of the Reinvestment Period could adversely affect a CLO investment.
- *Credit Risk.* The risk that the Fund could lose money if the issuer or guarantor of a fixed income security is unwilling or unable to make timely payments to meet its contractual obligations on investments held by the Fund. Changes in the credit rating of a debt security held by the Fund could have a similar effect.
- *Currency Risk.* The risk that foreign (non-U.S.) currencies will decline in value relative to the U.S. dollar and adversely affect the value of the Fund’s investments in foreign (non-U.S.) currencies or in securities that trade in, and receive revenues in, or in derivatives that provide exposure to, foreign (non-U.S.) currencies.

- *Cybersecurity Risk.* There is risk to the Fund of an unauthorized breach and access to fund assets, customer data (including private shareholder information), or proprietary information, or the risk of an incident occurring that causes the Fund, the investment adviser, custodian, transfer agent, distributor and other service providers and financial intermediaries to suffer data breaches, data corruption or lose operational functionality. Successful cyber-attacks or other cyber-failures or events affecting the Fund or its service providers may adversely impact the Fund or its shareholders.
- *Derivatives Risk.* The derivative instruments in which the Fund may invest for hedging purposes, including futures, options, credit default swaps, total return swaps, repurchase agreements and other similar instruments, may be more volatile than other instruments, and may be subject to unanticipated market movements, which are potentially unlimited. The risks associated with investments in derivatives also include leverage, liquidity, interest rate, market, credit and management risks, mispricing or improper valuation. Changes in the market value of a derivative may not correlate perfectly with the underlying asset, rate or index, and the Fund could lose more than the principal amount invested. In addition, if a derivative is being used for hedging purposes there can be no assurance given that each derivative position will achieve a perfect correlation with the security or currency against which it is being hedged, or that a particular derivative position will be available when sought by the portfolio manager.
- *Emerging Markets Risk.* Investing in emerging markets involves not only the risks described herein with respect to investing in foreign securities, but also other risks, including exposure to economic structures that are generally less diverse and mature, and to political systems that can be expected to have less stability than those of developed countries. The typically small size of the markets may also result in a lack of liquidity and in price volatility of these securities. Emerging markets are riskier than more developed markets because they tend to develop unevenly and may never fully develop. Investments in emerging markets may be considered speculative and share the risks of foreign developed markets but to a greater extent. Emerging markets are more likely to experience hyperinflation and currency devaluations, which adversely affect returns to U.S. investors. In addition, many emerging financial markets have far lower trading volumes and less liquidity than developed markets, which may result in increased price volatility of emerging market investments. The legal remedies for investors in emerging markets may be more limited than the remedies available in the U.S., and the ability of U.S. authorities (e.g., SEC and the U.S. Department of Justice) to bring actions against bad actors may be limited.
- *Financial Services Sector Risk.* There are risks associated with the financial services sector. The financial services sector includes companies engaged in banking, commercial and consumer finance, investment banking, brokerage, asset management, custody or insurance. To the extent that the Fund's (or an Underlying Fund's) investments include companies that operate in the financial services sector, the investments would be sensitive to changes in, and the Fund's performance may depend on, the overall condition of the financial services sector. Companies in the financial services sector are subject to extensive government regulation that can affect the scope of their activities, the prices they can charge or the amount of capital they must maintain. The profitability of companies in the financial services sector may be adversely affected by changes in interest rates, government regulation, the rate of defaults on corporate, consumer and government debt, the availability and cost of capital, and the impact of more stringent capital requirements. The profitability of companies in the financial services sector may also be adversely affected by loan losses, which usually increase in economic downturns. The Fund may be adversely affected by events or developments negatively impacting the financial services sector.
- *Foreign (Non-U.S.) Investment Risk.* Foreign (non-U.S.) securities present greater investment risks than investing in the securities of U.S. issuers and may experience more rapid and extreme changes in value than the securities of U.S. companies, due to less information about foreign (non-U.S.) companies in the form of reports and ratings than about U.S. issuers; different accounting, auditing and financial reporting requirements; smaller markets; nationalization; expropriation or confiscatory taxation; currency blockage; or political changes or diplomatic developments. Foreign (non-U.S.) securities may also be less liquid and more difficult to value than securities of U.S. issuers.
- *Gap Risk.* The Fund is subject to the risk that stock price or derivative value will change dramatically from one level to another with no trading in between and/or before the Fund can exit from the investment. Usually such movements occur when there are adverse news announcements, which can cause a stock price or derivative value to drop substantially from the previous day's closing price. Trading halts may lead to gap risk.
- *Industry Concentration Risk.* The Fund may be susceptible to an increased risk of loss, including losses due to adverse events that affect the Fund's investment more than the market as a whole, to the extent that the Fund's investments are concentrated in securities of a particular industry, group of industries or sector.
- *Investment Companies and Exchange-Traded Funds ("ETFs") Risk.* When the Fund invests in other investment companies, including closed-end funds and ETFs, it will bear additional expenses based on its pro rata share of the other investment company's or ETF's operating expenses, including management fees in addition to those paid by the Fund. The risk of owning an investment company or ETF generally reflects the risks of owning the underlying investments held by the investment company or ETF. The Fund also will incur brokerage costs when it purchases and sells closed-end funds or ETFs. During periods of market volatility, inverse ETFs may not perform as expected.

- *LIBOR Risk.* The Fund may invest in securities and other instruments whose interest payments are determined by references to the London Interbank Offered Rate (“LIBOR”). The United Kingdom Financial Conduct Authority, which regulates LIBOR, announced that after 2021 it will cease its active encouragement of banks to provide the quotations needed to sustain LIBOR. On March 5, 2021, ICE Benchmark Administration Limited, the administrator of LIBOR, announced its intention to cease publishing a majority of the USD LIBOR rates immediately after publication on June 30, 2023, with the remaining USD LIBOR rates to end immediately after publication on December 31, 2021. The unavailability of LIBOR presents risks to the Fund, including the risk that any pricing or adjustments to the Fund’s investments resulting from a substitute or alternate reference rate may adversely affect the Fund’s performance and/or NAV. It remains uncertain how such changes would be implemented and the effects such changes would have on the Fund, including any negative effects on the Fund’s liquidity and valuation of the Fund’s investments, issuers of instruments in which the Fund invests and financial markets generally.
- *Liquidity Risk.* Liquidity risk exists when particular investments of the Fund would be difficult to purchase or sell, possibly preventing the Fund from selling such illiquid securities at an advantageous time or price, or possibly requiring the Fund to dispose of other investments at unfavorable times or prices in order to satisfy its obligations. In the past, in stressed markets, certain types of securities suffered periods of illiquidity if disfavored by the market. All of these risks may increase during periods of market turmoil, such as that experienced in 2020 with COVID-19, and could have a negative effect on the Fund’s performance. The Fund is also exposed to liquidity risk through its investment in underlying funds that hold illiquid securities.
- *Portfolio Turnover Risk.* The Fund may experience high portfolio turnover, including investments made on a shorter-term basis, which may lead to increased Fund expenses that may result in lower investment returns. High portfolio turnover may also result in higher short-term capital gains taxable to shareholders.
- *Preferred Stock Risk.* The value of preferred stocks will fluctuate with changes in interest rates. Typically, a rise in interest rates causes a decline in the value of preferred stock. Preferred stocks are also subject to credit risk, which is the possibility that an issuer of preferred stock will fail to make its dividend payments. Preferred stock prices tend to move more slowly upwards than common stock prices. Convertible preferred stock tends to be more volatile than non-convertible preferred stock, because its value is related to the price of the issuer’s common stock as well as the dividends payable on the preferred stock. The value of preferred stocks will usually react more strongly than bonds and other debt securities to actual or perceived changes in issuer’s financial condition or prospects and may be less liquid than common stocks.
- *Quantitative Investing Risk.* The Adviser may use proprietary computer trading modeling systems to implement its investment strategies for the Fund. Investments selected using these models may perform differently than the market as a whole or from their expected performance as a result of the factors used in the models, the weight placed on each factor, changes from the factors’ historical trends and technical issues in the construction and implementation of the models. There is no assurance that the models are complete or accurate, or representative of future market cycles, nor will they necessarily be beneficial to the Fund if they are accurate. These systems may negatively affect Fund performance for various reasons, including human judgment, inaccuracy of historical data and non-quantitative factors (such as market or trading system dysfunctions, investor fear or over-reaction).
- *Treasury Inflation Protected Securities Risk.* The value of inflation protected securities issued by the U.S. Treasury (“TIPS”) generally fluctuates in response to inflationary concerns. As inflationary expectations increase, TIPS will become more attractive, because they protect future interest payments against inflation. Conversely, as inflationary concerns decrease, TIPS will become less attractive and less valuable.
- *Underlying Fund Risk.* The risk that the Fund’s investment performance and its ability to achieve its investment objective are directly related to the performance of the Underlying Funds in which it invests. There can be no assurance that the Underlying Funds will achieve their respective investment objectives. The Fund is subject to the risks of the Underlying Funds in direct proportion to the allocation of its assets among the Underlying Funds.
- *U.S. Government Securities Risk.* Treasury obligations may differ in their interest rates, maturities, times of issuance and other characteristics. Obligations of U.S. Government agencies and authorities are supported by varying degrees of credit but generally are not backed by the full faith and credit of the U.S. Government. No assurance can be given that the U.S. Government will provide financial support to its agencies and authorities if it is not obligated by law to do so. In addition, the value of U.S. Government securities may be affected by changes in the credit rating of the U.S. Government.
- *Volatility Risk.* The Fund’s investments may appreciate or decrease significantly in value over short periods of time. The value of an investment in the Fund’s portfolio may fluctuate due to events or factors that affect industries, sectors or markets generally or that affect a particular investment, industry or sector. The value of an investment in the Fund’s portfolio may also be more volatile than the market as a whole. Volatility may affect the Fund’s net asset value per share, including by causing it to experience significant increases or declines in value over short periods of time.

Performance: The bar chart and performance table below show the variability of the Fund's returns, which is some indication of the risks of investing in the Fund. The bar chart shows performance of the Fund's Class I shares for each calendar year since the Fund's inception. Returns for Investor Class shares and Class A Shares, which are not presented in the bar chart, will vary from the returns of Class I shares. Investor Class shares and Class A Shares are invested in the same portfolio of securities and the annual returns differ only to the extent that the Classes do not have the same expenses. Sales loads or account fees are not reflected in the bar chart. If these amounts were reflected, returns would be less than those shown. The performance table compares the performance of the Fund's shares over time to the performance of a broad-based market index. After-tax returns for Investor Class Shares and Class A Shares, which are not presented in the performance table, will vary from the returns of Class I shares. You should be aware of the Fund's past performance (before and after taxes) may not be an indication of how the Fund will perform in the future. Updated performance information will be available at no cost by visiting www.holbrookholdings.com or by calling 1-877-345-8646.

Best Quarter Second Quarter 2020 13.41%
Worst Quarter First Quarter 2020 (16.01)%

The year-to-date return as of the most recent calendar quarter, which ended June 30, 2021, was 5.80%.

Return before taxes	6.20%	4.46%
Class A Shares		
Return before taxes	N/A ⁽²⁾	N/A ⁽²⁾
Bank of America/Merrill Lynch 1-3 Year U.S. Corporate & Government Bond Index⁽²⁾ (reflects no deduction for fees, expenses or taxes)	3.35%	2.10%

(1) Inception date is July 6, 2016 for Class I and Investor Class.

(2) Class A is a newly formed class and performance information will be included when that share class has been operational for a full calendar year.

(3) The Bank of America /Merrill Lynch 1-3 Year U.S. Corporate & Government Bond Index is a subset of the Bank of America Merrill Lynch U.S. Government/Corporate Index and tracks the performance of investment-grade debt securities with a remaining term to final maturity of less than 3 years. Investors cannot invest directly in an index or benchmark. Index returns are gross of any fees, brokerage commissions or other expenses of investing.

After-tax returns for Class I shares are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown above, and after-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.

Investment Adviser: Holbrook Holdings Inc. (“Holbrook” or the “Adviser”) serves as investment adviser to the Fund.

Portfolio Manager: The Fund is managed by Scott Carmack, Portfolio Manager and Chief Executive Officer. Mr. Carmack has managed the Fund since its inception in 2016.

Purchase and Sale of Fund Shares: You may purchase and redeem shares of the Fund on any day that the New York Stock Exchange is open for trading by written request, by telephone at 1-877-345-8646, or through your broker. Redemptions will be paid by automated clearing house funds (“ACH”), check or wire transfer. The Fund or its Adviser may waive any of the minimum initial and subsequent investment amounts.

Class	Minimum Investment	
	Initial	Subsequent
I	\$100,000	\$500
Investor	\$2,500	\$100
Class A Shares	\$2,500	\$100

Tax Information: Dividends (including qualified dividend income) and capital gain distributions you receive from the Fund, whether you reinvest your distributions in additional Fund shares or receive them in cash, are generally taxable to you at either ordinary income or capital gains tax rates unless you are investing through a tax-deferred plan such as an IRA or 401(k) plan.

Payments to Broker-Dealers and Other Financial Intermediaries: If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies, including the Adviser, may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.

ADDITIONAL INFORMATION ABOUT PRINCIPAL INVESTMENT STRATEGIES AND RELATED RISKS

Investment Objective: The Fund seeks to provide current income, with a secondary objective of capital preservation in a rising interest rate environment. The Fund’s investment objective may be changed by the Fund’s Board of Trustees upon 60 days, prior written notice to shareholders.

Principal Investment Strategies: The Fund normally invests at least 80% of its net assets, including any borrowings for investment purposes, in a diversified portfolio of fixed income instruments. In seeking to achieve its investment objective, the Fund will allocate up to 100% of its portfolio in fixed income securities through direct investments or through the purchase of closed end investment companies and exchange-traded funds (together, the “Underlying Funds”) that invest primarily in income producing securities. In managing the Fund’s portfolio, the Adviser seeks to protect principal in a rising interest rate environment, although there is no guarantee that this strategy will succeed.

Using a top down asset allocation model, the Fund may invest all or a portion of its assets in fixed income securities such as corporate bonds, preferred securities, convertible securities, treasury inflation protected securities (“TIPS”) and collateralized loan obligations (“CLOs”). The Fund may also invest in senior notes issued by business development companies (also known as “baby bonds”). The Adviser may also allocate up to 50% of the Fund’s assets in the common and preferred stock of Underlying Funds. The Fund’s investments in preferred stock will be counted toward the 80% policy discussed above to the extent such investments have characteristics similar to debt securities and are considered to be corporate bonds. The Fund may invest directly or indirectly in fixed income securities of any maturity or quality, including investing up to 50% of the Fund’s assets in securities rated below investment grade (securities rated below BBB by Standard & Poor’s (“S&P”) and Baa3 by Moody’s Investor Services, Inc. (“Moody’s”) are often referred to as “high yield” or “junk bonds”). The Fund may invest without limit in U.S. and non-U.S. dollar denominated securities of U.S. and foreign issuers, including issuers located in emerging market countries. The Fund may invest in fixed income instruments with fixed or adjustable (floating) rates, including in securities or instruments that utilize LIBOR as a reference.

The Adviser uses macro-economic projections, fundamental company and industry analysis, and technical analysis of individual issuers to strategically position the Fund, making tactical adjustments as investing conditions change. The Fund seeks target allocations in multiple sectors and will typically hold approximately 70% of its assets in investment grade fixed income securities, directly or through one or more Underlying Funds that predominantly hold investment grade securities, although the amount may be higher or lower depending on market conditions. When selecting underlying securities, the Adviser considers a number of factors, including fundamental and technical analysis to assess the relative risk and reward potential. The Adviser will invest in closed end funds to take advantage of pricing discrepancies in the closed end fund market. The Adviser performs both a quantitative and qualitative analysis of closed end funds prior to any closed end fund being added to the Fund’s portfolio. This analysis and the Adviser’s proprietary computer trading programs help determine when to buy and sell the closed end funds in the Fund’s portfolio. The Fund will sell a portfolio holding when the security no longer meets its investment criteria or when a more attractive investment is available.

The Fund may, when market signals warrant, go defensive, investing all or a substantial portion of Fund assets in cash and/or cash equivalents. The Fund may also, at times, use derivatives, including but not limited to futures, options, credit default swaps, total return swaps and repurchase agreements, as a substitute for making direct investments in underlying investments, to reduce certain exposure or to “hedge” against market volatility and other risks.

Principal and Other Investment Risks: As with all funds, there is the risk that you could lose money through your investment in the Fund. An investment in the Fund is not guaranteed to achieve its investment objective; is not a deposit with a bank; is not insured, endorsed or guaranteed by the Federal Deposit Insurance Corporation or any other government agency; and is subject to investment risks. The Adviser cannot guarantee that the Fund will achieve their objectives. The value of your investment in the Fund, as well as the amount of return you receive on your investment, may fluctuate significantly. You may lose part or all of your investment in the Fund or your investment may not perform as well as other similar investments. The Fund is not intended to be a complete investment program but rather one component of a diversified investment portfolio. Many factors affect the Fund’s net asset value and performance. It is important that investors closely review and understand these risks before making an investment in the Fund. Additional information regarding the principal and certain other risks of investing in the Fund is provided below. The Fund’s Statement of Additional Information (“SAI”), which is incorporated by reference into this Prospectus, includes more information about the Fund and its investments and risks. The risks described in this Prospectus (and in the SAI) are not intended to include every potential risk of investing in the Fund. The Fund could be subject to additional risks because the types of investments it makes may change over time.

The following section provides additional information regarding certain of the principal risks identified under “Principal Risk Factors” in the Fund’s summary along with additional risk information. The Fund may be subject to the risks described below through its own direct investments and indirectly through investments in the Underlying Funds.

- *Baby Bonds Risk.* Senior notes, also referred to as “baby bonds”, are bonds designed to trade like preferred securities. They trade in \$25 par amounts, pay quarterly interest, and are typically callable five years after issuance. The primary risk associated with the Fund’s investments in baby bonds is that the issuer or insurer of a baby bond may default on principal and/or interest payments when due on the baby bond. Such a default would have the effect of lessening the income generated by the Fund and/or the value of the baby bonds. Baby bonds are also subject to typical credit ratings risks associated with other fixed-income instruments.
- *BDC Risk.* BDCs may carry risks similar to those of a private equity or venture capital fund. BDC company securities are not redeemable at the option of the shareholder and they may trade in the market at a discount to their net asset value. A BDC is a form of investment company that is required to invest at least 70% of its total assets in securities (typically debt) of private companies, thinly traded U.S. public companies, or short-term high-quality debt securities. The BDCs held by the Fund may leverage their portfolios through borrowings or the issuance of preferred stock. While leverage often serves to increase the yield of a BDC, this leverage also subjects a BDC to increased risks, including the likelihood of increased volatility and the possibility that a BDC’s common share income will fall if the dividend rate of the preferred shares or the interest rate on any borrowings rises. A significant portion of a BDC’s investments are recorded at fair value as determined by its board of directors which may create uncertainty as to the value of the BDC’s investments. Non-traded BDCs are illiquid and it may not be possible to redeem shares or to do so without paying a substantial penalty. Publicly traded BDCs usually trade at a discount to their net asset value because they invest in unlisted securities and have limited access to capital markets. BDCs are subject to high failure rates among the companies in which they invest and federal securities laws impose restraints upon the organization and operations of BDCs that can limit or negatively impact the performance of a BDC. Also, BDCs may engage in certain principal and joint transactions that a mutual fund or closed-end fund may not without an exemptive order from the SEC.
- *Cash Positions Risk.* The Fund may hold a significant position in cash, cash equivalent securities or U.S. Treasury investments. When the Fund’s investment in cash, cash equivalent securities or U.S. Treasury investment increases, the Fund may not participate in market advances or declines to the same extent that it would if the Fund were more fully invested.
- *Closed End Fund Risk.* The Fund invests in closed end investment companies or funds. The shares of many closed end funds, after their initial public offering, frequently trade at a price per share that is less than the net asset value per share, the difference representing the “market discount” of such shares. This market discount may be due in part to the investment objective of long-term appreciation, which is sought by many closed end funds, as well as to the fact that the shares of closed end funds are not redeemable by the holder upon demand to the issuer at the next determined net asset value, but rather, are subject to supply and demand in the secondary market. A relative lack of secondary market purchasers of closed end fund shares also may contribute to such shares trading at a discount to their net asset value.

The Fund may invest in shares of closed end funds that are trading at a discount to net asset value or at a premium to net asset value. There can be no assurance that the market discount on shares of any closed end fund purchased by the Fund will ever decrease. In fact, it is possible that this market discount may increase and the Fund may suffer realized or unrealized capital losses due to further decline in the market price of the securities of such closed end funds, thereby adversely affecting the net asset value of the Fund’s shares. Similarly, there can be no assurance that any shares of a closed end fund purchased by the Fund at a premium will continue to trade at a premium or that the premium will not decrease subsequent to a purchase of such shares by the Fund.

Closed end funds may issue senior securities (including preferred stock and debt obligations) for the purpose of leveraging the closed end fund's common shares in an attempt to enhance the current return to such closed end fund's common shareholders. The Fund's investment in the common shares of closed end funds that are financially leveraged may create an opportunity for greater total return on its investment, but at the same time may be expected to exhibit more volatility in market price and net asset value than an investment in shares of investment companies without a leveraged capital structure.

- *Collateralized Loan Obligations Risk.* In addition to the normal interest rate, default and other risks of fixed income securities, collateralized loan obligations carry additional risks, including the possibility that distributions from collateral securities will not be adequate to make interest or other payments, the quality of the collateral may decline in value or default, an Underlying Fund may invest in collateralized loan obligations that are subordinate to other classes, values may be volatile, and disputes with the issuer may produce unexpected investment results.

The Fund is subject to the following risks as a result of its investments in CLOs:

- *Asset Manager Risk.* The CLO's performance is linked to the expertise of the CLO manager and its ability to manage the CLO portfolio. The experience of a CLO manager plays an important role in the rating and risk assessment of CLO debt securities. One of the primary risks to investors of a CLO is the potential change in CLO manager, over which the Fund will have no control.
- *Legal and Regulatory Risk.* The Fund may be adversely affected by new (or revised) laws or regulations that may be imposed by government regulators or self-regulatory organizations that supervise the financial markets. These agencies are empowered to promulgate a variety of rules pursuant to financial reform legislation in the United States. The Fund may also be adversely affected by changes in the enforcement or interpretation of existing statutes and rules. Changes in the regulation of CLOs may adversely affect the value of the investments held by the Fund and the ability of the Fund to execute its investment strategy.
- *Limited Recourse Risk.* CLO debt securities are limited recourse obligations of their issuers. CLO debt is payable solely from the proceeds of its underlying assets. Consequently, CLO investors must rely solely on distributions from the underlying assets for payments on the CLO debt they hold. No party or entity other than the issuer will be obligated to make payments on CLO debt. CLO debt is not guaranteed by the issuer or any other party or entity involved in the organization and management of a CLO. If income from the underlying loans is insufficient to make payments on the CLO debt, no other assets will be available for payment.
- *Redemption Risk.* CLO debt securities may be subject to redemption. For example, certain tranches of CLO debt may be redeemed if the CLO manager is unable to identify assets suitable for investment during the period when it has the ability to reinvest the principal proceeds from the sale of assets, scheduled redemptions and prepayments in additional assets (the "Reinvestment Period"). Additionally, holders of subordinated CLO debt may cause the redemption of senior CLO debt. In the event of an early redemption, holders of the CLO debt being redeemed will be repaid earlier than the stated maturity of the debt. The timing of redemptions may adversely affect the returns on CLO debt.
- *Reinvestment Risk.* The CLO manager may not find suitable assets in which to invest during the Reinvestment Period or to replace assets that the manager has determined are no longer suitable for investment (for example, if a security has been downgraded by a rating agency). Additionally, the reinvestment period is a pre-determined finite period of time; however, there is a risk that the reinvestment period may terminate early if, for example, the CLO defaults on payments on the securities which it issues or if the CLO manager determines that it can no longer reinvest in underlying assets. Early termination of the Reinvestment Period could adversely affect a CLO investment
- *Credit Risk.* The risk that issuers or guarantors of a fixed income security cannot or will not make payments on the securities and other investments held by the Fund, may result in losses to the Fund. Changes in the credit rating of a debt security or of the issuer of a debt security held by the Fund could have a similar effect. The credit quality of securities held by the Fund may be lowered if an issuer's financial condition changes, which may lower their value and may affect their liquidity. Generally, the lower the credit rating of a security, the greater the risk that the issuer of the security will default on its obligation. High quality securities are generally believed to have relatively low degrees of credit risk. The Fund intends to enter into financial transactions with counterparties that are creditworthy at the time of the transactions. There is always the risk that the Investment Adviser's analysis of creditworthiness is incorrect or may change due to market conditions. To the extent that the Fund focuses its transactions with a limited number of counterparties, it will be more susceptible to the risks associated with one or more counterparties.
- *Currency Risk.* The risk that foreign (non-U.S.) currencies will decline in value relative to the U.S. dollar and adversely affect the value of the Fund's investments in foreign (non-U.S.) currencies or in securities that trade in, and receive revenues in, or in derivatives that provide exposure to, foreign (non-U.S.) currencies. Currency risk may be particularly high to the extent that the Fund invests in foreign (non-U.S.) currencies or engages in foreign currency transactions that are economically tied to emerging market countries.

- *Cybersecurity Risk.* There is risk to the Fund of an unauthorized breach and access to fund assets, customer data (including private shareholder information), or proprietary information, or the risk of an incident occurring that causes the Fund, the investment advisor, administrator, custodian, transfer agent, distributor, and other service providers and financial intermediaries (collectively “Service Providers”) to suffer data breaches, data corruption or lose operational functionality. Successful cyber-attacks or other cyber-failures or events affecting the Fund, or its Service Providers may adversely impact the Fund or its shareholders. Because information technology (“IT”) systems and digital data underlie most of the Fund’s operations, the Fund and its Adviser, custodian, transfer agent, distributor and other service providers and the financial intermediaries (collectively “Service Providers”) are exposed to the risk that their operations and data may be compromised as a result of internal and external cyber-failures, breaches or attacks (“Cyber Risk”). This could occur as a result of malicious or criminal cyber-attacks. Cyber-attacks include actions taken to: (i) steal or corrupt data maintained online or digitally, (ii) gain unauthorized access to or release confidential information, (iii) shut down the Fund or Service Provider website through denial-of-service attacks, or (iv) otherwise disrupt normal business operations. Events arising from human error, faulty or inadequately implemented policies and procedures or other systems failures unrelated to any external cyber-threat may have effects similar to those caused by deliberate cyber-attacks.
- *Derivatives Risk.* The Fund may invest, either directly or through an underlying fund, in derivatives, which are financial instruments whose value is typically based on the value of a security, commodity, index or other instrument. These instruments include futures, options, credit default swaps, futures contracts, forward currency contracts, swap agreements, including total return swap, repurchase agreements and other similar instruments. Derivatives may also include customized baskets or options (which may incorporate other securities directly and also various derivatives including common stock, options, and futures) structured as agreed upon by a counterparty, as well as specially structured types of mortgage- and asset-backed securities whose value is often linked to commercial and residential mortgage portfolios. The Fund’s use of derivative instruments involves risks different from, and possibly greater than, the risks associated with investing directly in securities and other more traditional investments, and certain derivatives may create a risk of loss greater than the amount invested.

Investing for hedging purposes or to increase the Fund’s return may result in certain additional transaction costs that may reduce the Fund’s performance. The Fund may use a variety of currency hedging techniques to attempt to hedge exchange rate risk or gain exposure to a particular currency. When used for hedging purposes, no assurance can be given that each derivative position will achieve a perfect correlation with the investment against which it is being hedged. Because the markets for certain derivative instruments are relatively new, suitable derivatives transactions may not be available in all circumstances for risk management or other purposes and there can be no assurance that a particular derivative position will be available when sought by the Adviser or that such techniques will be utilized by the Adviser.

The market value of derivative instruments and securities may be more volatile than that of other instruments, and may be subject to unanticipated market movements, which are potentially unlimited. Each type of derivative instrument may have its own special risks, including the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates, and indices. Many derivatives, in particular privately negotiated derivatives, are complex and often valued subjectively. Improper valuations can result in increased cash payment requirements to counterparties or a loss of value to the Fund. The value of derivatives may not correlate perfectly, or at all, with the value of the assets, reference rates or indices they are designed to closely track.

Derivatives are subject to a number of other risks, including liquidity risk (the possibility that the derivative may be difficult to purchase or sell and the Adviser may be unable to initiate a transaction or liquidate a position at an advantageous time or price), leverage risk (the possibility that adverse changes in the value or level of the underlying asset, reference rate or index can result in loss of an amount substantially greater than the amount invested in the derivative), interest rate risk (some derivatives are more sensitive to interest rate changes and market price fluctuations), and counterparty risk (the risk that a counterparty may be unable to perform according to a contract, and that any deterioration in a counterparty’s creditworthiness could adversely affect the instrument). In addition, because derivative products are highly specialized, investment techniques and risk analyses employed with respect to investments in derivatives are different from those associated with stocks and bonds. Finally, the Fund’s use of derivatives may cause the Fund to realize higher amounts of short-term capital gains (generally taxed at ordinary income tax rates) than if the Fund had not used such instruments. Derivative instruments are also subject to the risk that the market value of an instrument will change to the detriment of the Fund. If the Adviser inaccurately forecast the values of securities, currencies or interest rates or other economic factors in using derivatives, the Fund might have been in a better position if it had not entered into the transaction at all. Some strategies involving derivative instruments can reduce the risk of loss, but they can also reduce the opportunity for gain or result in losses by offsetting favorable price movements in other investments held by the Fund. The Fund may also have to buy or sell a security at a disadvantageous time or price because regulations require funds to maintain offsetting positions or asset coverage in connection with certain derivatives transactions.

The Fund’s Statement of Additional Information (“SAI”) provides a more detailed description of the types of derivative instruments in which the Fund may invest and their associated risks.

- Emerging Markets Risk.* To the extent the Fund invests in emerging market securities, the risks associated with foreign (non-U.S.) investment risk may be particularly high. The Fund's investments in emerging market countries are subject to all of the risks of foreign investing generally, and have additional heightened risks due to a lack of established legal, political, business and social frameworks to support securities markets. These risks include less social, political and economic stability; smaller securities markets with low or nonexistent trading volume and greater illiquidity and price volatility; more restrictive national policies on foreign investment, including restrictions on investment in issuers or industries deemed sensitive to national interests; less transparent and established taxation policies; less developed regulatory or legal structures governing private and foreign investment; more pervasiveness of corruption and crime; less financial sophistication, creditworthiness and/or resources possessed by, and less government regulation of, the financial institutions and issuers with which the Fund transacts; less government supervision and regulation of business and industry practices, stock exchanges, brokers and listed companies than in the U.S.; greater concentration in a few industries resulting in greater vulnerability to regional and global trade conditions; higher rates of inflation and more rapid and extreme fluctuations in inflation rates; greater sensitivity to interest rate changes; increased volatility in currency exchange rates and potential for currency devaluations and/or currency controls; greater debt burdens relative to the size of the economy; more delays in settling portfolio transactions and heightened risk of loss from share registration and custody practices; and less assurance that recent favorable economic developments will not be slowed or reversed by unanticipated economic, political or social events in such countries. Because of these risk factors, the Fund's investments in developing market countries are subject to greater price volatility and illiquidity than investments in developed markets. Governments of emerging market countries may own or control parts of the private sector. Accordingly, government actions could have a significant impact on economic conditions. Certain emerging market countries require governmental approval prior to investments by foreign persons, limit the amount of investment by foreign persons in a particular sector and/or company, limit the investment by foreign persons to a specific class of securities of an issuer that may have less advantageous rights than a domestically available class, require foreign investors to maintain a trading account with only one licensed securities company in the relevant market and/or impose additional taxes on foreign investors. These may contribute to the illiquidity of the relevant securities market, as well as create inflexibility and uncertainty as to the trading environment. The legal remedies for investors in emerging markets may be more limited than the remedies available in the U.S., and the ability of U.S. authorities (e.g., SEC and the U.S. Department of Justice) to bring actions against bad actors may be limited.
- Financial Services Sector Risk.* There are risks associated with the financial services sector. The financial services sector includes companies engaged in banking, commercial and consumer finance, investment banking, brokerage, asset management, custody or insurance. To the extent that the Fund's (or an Underlying Fund's) investments include companies that operate in the financial services sector, the investments would be sensitive to changes in, and the Fund's performance may depend on, the overall condition of the financial services sector. Companies in the financial services sector are subject to extensive government regulation that can affect the scope of their activities, the prices they can charge or the amount of capital they must maintain. The profitability of companies in the financial services sector may be adversely affected by changes in interest rates, government regulation, the rate of defaults on corporate, consumer and government debt, the availability and cost of capital, and the impact of more stringent capital requirements. The profitability of companies in the financial services sector may also be adversely affected by loan losses, which usually increase in economic downturns. The Fund may be adversely affected by events or developments negatively impacting the financial services sector.
- Fixed Income Securities Risk.* Fixed income securities held by the Fund are subject to interest rate risk, call risk, prepayment and extension risk, credit risk, duration risk and liquidity risk, which are more fully described below. In addition, current market conditions may pose heightened risks for fixed income securities. The Fund may lose money if short-term or long-term interest rates rise sharply in a manner not anticipated by Fund management. A general rise in interest rates has the potential to cause investors to move out of fixed-income securities on a large scale, which may increase redemptions from funds that hold large amounts of fixed-income securities. Heavy redemptions could cause the Fund to sell assets at inopportune times or at a loss or depressed value and could hurt the Fund's performance. When the Fund invests in fixed income securities or derivatives, the value of your investment in the Fund will fluctuate with changes in interest rates. Typically, a rise in interest rates causes a decline in the value of fixed income securities or derivatives owned by the Fund. In general, the market price of fixed income securities with longer maturities or durations will increase or decrease more in response to changes in interest rates than shorter-term securities. Risks associated with rising interest rates are heightened given that interest rates in the U.S. currently remain near historic lows. Other risk factors include credit risk (the debtor may default) and prepayment risk (the debtor may pay its obligation early, reducing the amount of interest payments). These risks could affect the value of a particular investment by the Fund, possibly causing the Fund's share price and total return to be reduced and fluctuate more than other types of investments. Moreover, new regulations applicable to and changing business practices of financial intermediaries that make markets in fixed income securities have resulted in less market making activity for certain fixed income securities, which has reduced the liquidity and may increase the volatility for such fixed income securities. Liquidity may decline unpredictably in response to overall economic conditions or credit tightening. For example, a general rise in interest rates may cause investors to move out of fixed income securities on a large scale, which could adversely affect the price and liquidity of fixed income securities. Duration risk arises when holding long duration and long maturity investments, which will magnify certain risks, including interest rate risk and credit risk.

- *Call Risk.* During periods of declining interest rates, a bond issuer may “call,” or repay, its high yielding bonds before their maturity dates. The Fund would then be forced to invest the unanticipated proceeds at lower interest rates, resulting in a decline in its income.
- *Credit Risk.* Fixed income securities are generally subject to the risk that the issuer may be unable to make principal and interest payments when they are due. There is also the risk that the securities could lose value because of a loss of confidence in the ability of the borrower to pay back debt. Lower rated fixed income securities involve greater credit risk, including the possibility of default or bankruptcy.
- *Duration Risk.* Longer-term securities may be more sensitive to interest rate changes. Given the recent, historically low interest rates and the potential for increases in those rates, a heightened risk is posed by rising interest rates to longer-term fixed income securities. Effective duration estimates price changes for relatively small changes in rates. If rates rise significantly, effective duration may tend to understate the drop in a security’s price. If rates drop significantly, effective duration may tend to overstate the rise in a security’s price.
- *Interest Rate Risk.* Fixed income securities are subject to the risk that the securities could lose value because of interest rate changes. For example, bonds tend to decrease in value if interest rates rise. Fixed income securities with longer maturities or durations sometimes offer higher yields but are subject to greater price shifts as a result of interest rate changes than fixed income securities with shorter maturities. Investments in fixed income securities with longer maturities or durations may result in greater fluctuations in the value of the Fund. The Fund has no policy limiting the maturity or duration of the fixed income securities it purchases.
- *Liquidity Risk.* Trading opportunities are more limited for fixed income securities that have not received any credit ratings, have received ratings below investment grade or are not widely held. These features make it more difficult to sell or buy a security at a favorable price or time. Consequently, the Fund may have to accept a lower price to sell a security, sell other securities to raise cash or give up an investment opportunity, any of which could have a negative effect on its performance. Infrequent trading of securities may also lead to an increase in their price volatility. Liquidity risk also refers to the possibility that the Fund may not be able to sell a security or close out an investment contract when it wants to. If this happens, the Fund will be required to hold the security or keep the position open, and it could incur losses. In addition, less liquid securities may be more difficult to value, and markets may become less liquid when there are fewer interested buyers or sellers or when dealers are unwilling or unable to make a market for certain securities. Recently, dealers have generally been less willing to make markets for fixed income securities. All of these risks may increase during periods of market turmoil and could have a negative effect on the Fund’s performance.
- *Prepayment and Extension Risk.* Many types of fixed income securities are subject to prepayment risk. Prepayment occurs when the issuer of a fixed income security can repay principal prior to the security’s maturity. Fixed income securities subject to prepayment can offer less potential for gains during a declining interest rate environment and similar or greater potential for loss in a rising interest rate environment. In addition, the potential impact of prepayment features on the price of a fixed income security can be difficult to predict and result in greater volatility. On the other hand, rising interest rates could cause prepayments of the obligations to decrease, extending the life of mortgage- and asset-backed securities with lower payment rates. This is known as extension risk and may increase the Fund’s sensitivity to rising rates and its potential for price declines.
- *Variable and Floating Rate Securities.* Variable and floating rate securities generally are less sensitive to interest changes but may decline in value if their interest rates do not rise as much, or as quickly, as interest rates in general. Floating rate securities will not generally increase in value if interest rates decline.
- *Foreign (Non-U.S.) Investment Risk.* Foreign (non-U.S.) securities present greater investment risks than investing in the securities of U.S. issuers and may experience more rapid and extreme changes in value than the securities of U.S. companies, due to less stringent foreign securities regulations and less information about foreign companies in the form of reports and ratings than about U.S. issuers; different accounting, auditing and financial reporting requirements; smaller markets; nationalization; expropriation or confiscatory taxation; currency blockage; or political, financial, social and economic events (including, for example, military confrontations, war and terrorism) or diplomatic developments. To the extent that the Fund invests a significant portion of its assets in a specific geographic region, the Fund will generally have more exposure to regional economic risks associated with foreign investments. Foreign securities may also be less liquid and more difficult to value than securities of U.S. issuers. In addition, foreign markets may have greater volatility than domestic markets and foreign securities may be less liquid and harder to value than domestic securities. Certain foreign markets may rely heavily on particular industries or foreign capital and are more vulnerable to diplomatic developments, the imposition of economic sanctions against a particular country or countries, organizations, entities and/or individuals, changes in international trading patterns, trade barriers, and other protectionist or retaliatory measures. International trade barriers or economic sanctions against foreign countries, organizations, entities and/or individuals may adversely affect the Fund’s foreign holdings or exposures.

Foreign securities include direct investments in non-U.S. dollar-denominated securities traded primarily outside of the United States and dollar-denominated securities of foreign issuers. Foreign securities also include indirect investments such as American Depositary Receipts (“ADRs”), European Depositary Receipts (“EDRs”) and Global Depositary Receipts (“GDRs”). ADRs are U.S. dollar-denominated receipts representing shares of foreign-based corporations. ADRs are receipts that are traded in the United States, and entitle the holder to all dividend and capital gain distributions that are paid out on the underlying foreign shares. EDRs and GDRs are receipts that often trade on foreign exchanges. They represent ownership in an underlying foreign or U.S. security and generally are denominated in a foreign currency. Foreign government obligations may include debt obligations of supranational entities, including international organizations (such as The International Bank for Reconstruction and Development, also known as the World Bank) and international banking institutions and related government agencies.

Foreign securities, and in particular foreign debt securities, are sensitive to changes in interest rates. In addition, investment in the securities of foreign governments involves the risk that foreign governments may default on their obligations or may otherwise not respect the integrity of their obligations. The performance of investments in securities denominated in a foreign currency also will depend, in part, on the strength of the foreign currency against the U.S. dollar and the interest rate environment in the country issuing the currency. Absent other events which otherwise could affect the value of a foreign security (such as a change in the political climate or an issuer’s credit quality), appreciation in the value of the foreign currency generally results in an increase in value of a foreign currency-denominated security in terms of U.S. dollars. A decline in the value of the foreign currency relative to the U.S. dollar generally results in a decrease in value of a foreign currency-denominated security. Additionally, many countries throughout the world are dependent on a healthy U.S. economy and are adversely affected when the U.S. economy weakens or its markets decline.

Investment in foreign securities may involve higher costs than investment in U.S. securities, including higher transaction and custody costs as well as the imposition of additional taxes by foreign governments. Foreign investments also may involve risks associated with the level of currency exchange rates, less complete financial information about the issuers, less market liquidity, more market volatility and political instability. Future political and economic developments, the possible imposition of withholding taxes on dividend income, the possible seizure or nationalization of foreign holdings, the possible establishment of exchange controls or freezes on the convertibility of currency, trade restrictions (including tariffs) or the adoption of other governmental restrictions might adversely affect an investment in foreign securities. Additionally, foreign banks and foreign branches of domestic banks may be subject to less stringent reserve requirements and to different accounting, auditing and recordkeeping requirements.

While the Fund’s investments may, if permitted, be denominated in foreign currencies, the portfolio securities and other assets held by the Fund or underlying funds are valued in U.S. dollars. Price fluctuations may occur in the dollar value of foreign securities because of changing currency exchange rates or, in the case of hedged positions, because the U.S. dollar declines in value relative to the currency hedged. Currency exchange rates may fluctuate significantly over short periods of time causing the Fund’s or Underlying Fund’s NAV to fluctuate as well. Currency exchange rates can be affected unpredictably by the intervention or the failure to intervene by U.S. or foreign governments or central banks, or by currency controls or political developments in the United States or abroad. To the extent that the Fund or Underlying Fund is invested in foreign securities while also maintaining currency positions, it may be exposed to greater combined risk. The net currency positions of the Fund or underlying funds may expose them to risks independent of their securities positions.

The Fund may operate in euros and/or may hold euros and/or euro-denominated bonds and other obligations. The euro requires participation of multiple sovereign states forming the Euro zone and is therefore sensitive to the credit and general economic and political positions of each such state, including, each state’s actual and intended ongoing engagement with and/or support for the other sovereign states then forming the European Union (“EU”), in particular those within the Euro zone. Changes in these factors might materially and adversely impact the value of securities in which the Fund or Underlying Fund has invested.

In addition, voters in the United Kingdom (“UK”) approved withdrawal from the EU and the UK withdrew from the EU on January 31, 2020. Securities issued by companies domiciled in the UK could be subject to changing regulatory and tax regimes. Banking and financial services companies that operate in the UK or EU could be disproportionately impacted by those actions. Other countries may seek to withdraw from the EU and/or abandon the euro, the common currency of the EU, which could exacerbate market and currency volatility and negatively impact the Fund’s investments in securities issued by companies located in EU countries. A number of countries in Europe have suffered terror attacks, and additional attacks may occur in the future. Ukraine has experienced ongoing military conflict; this conflict may expand and military attacks could occur in Europe. Europe has also been struggling with mass migration from the Middle East and Africa. Recent and upcoming European elections could, depending on the outcomes, further call into question the future direction of the EU. The ultimate effects of these events and other socio-political or geopolitical issues are not known but could profoundly affect global economies and markets. The impact of these actions, especially if they occur in a disorderly fashion, is not clear, but could be significant and far-reaching. Whether or not the Fund invests in securities of issuers located in Europe or with significant exposure to European issuers or countries, these events could negatively affect the value and liquidity of the Fund’s investments.

- *Gap Risk.* The Fund is subject to the risk that a stock price or derivative value will change dramatically from one level to another with no trading in between and/or before the Fund can exit the investment. Usually such movements occur when there are adverse news announcements, which can cause a stock price or derivative value to drop substantially from the previous day's closing price. For example, the price of a stock can drop from its closing price one night to its opening price the next morning. The difference between the two prices is the gap. Trading halts may lead to gap risk.
- *High Yield Risk.* Investment in or exposure to high yield (lower rated) debt instruments (also known as "junk bonds") may involve greater levels of interest rate, credit, liquidity and valuation risk than for higher rated instruments. High yield debt instruments are considered predominantly speculative with respect to the issuer's continuing ability to make principal and interest payments and, therefore, such instruments generally involve greater risk of default or price changes than higher rated debt instruments. An economic downturn or period of rising interest rates could adversely affect the value of these securities and market for these securities and reduce market liquidity (liquidity risk) of these securities. Less active markets can diminish the Fund's ability to obtain accurate market quotations when valuing portfolio securities and thereby give rise to valuation risk. If the issuer of a security is in default with respect to interest or principal payments, the issuer's security could lose its entire value. Furthermore, the transaction costs associated with the purchase and sale of high yield debt instruments may vary greatly depending on a number of factors and may adversely affect the Fund's performance.
- *Industry Concentration Risk.* The Fund may be susceptible to an increased risk of loss, including losses due to adverse events that affect the Fund's investment more than the market as a whole, to the extent that the Fund's investments are concentrated in securities of a particular industry, group of industries or sector.
- *Investment Companies and Exchange-Traded Funds Risk.* When the Fund invests in other investment companies, including closed-end funds and ETFs, it will bear additional expenses based on its pro rata share of the other investment company's or ETF's operating expenses, including the potential duplication of management fees. The risk of owning an ETF or other investment company generally reflects the risks of owning the underlying investments the underlying fund holds. The Fund also will incur brokerage costs when it purchases and sells closed-end funds or ETFs. In addition, the market value of ETF shares may differ from their net asset value. This difference in price may be due to the fact that the supply and demand in the market for fund shares at any point in time is not always identical to the supply and demand in the market for the underlying basket of securities. Accordingly, there may be times when ETF shares trade at a premium or discount to net asset value.
 - *Other ETF Risk.* In addition to the risks associated with the underlying assets held by an ETF, investments in ETFs are subject to the following additional risks: (1) an ETF's shares may trade above or below its net asset value; (2) an active trading market for the ETF's shares may not develop or be maintained; (3) trading an ETF's shares may be halted by the listing exchange; (4) a passively managed ETF may not track the performance of the reference asset; and (5) a passively managed ETF may hold troubled securities.
 - *Money Market Fund Risk.* The Fund may invest in money market mutual funds. An investment in a money market mutual fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Although money market mutual funds that invest in U.S. government securities seek to preserve the value of the Fund's investment at \$1.00 per share, it is possible to lose money by investing in a stable NAV money market mutual fund. Moreover, SEC rules require prime money market mutual funds to use floating NAVs that do not preserve the value of the Fund's investment at \$1.00 per share. These rule amendments may impact the Fund's use of prime money market mutual funds for capital preservation purposes.
- *Large Shareholder Transactions Risk.* The Fund or an Underlying Fund may experience adverse effects when certain large shareholders purchase or redeem large amounts of shares from the Fund or an Underlying Fund. Such large shareholder redemptions may cause the Fund or an Underlying Fund to sell their securities at times when it would not otherwise do so, which may negatively impact the Fund's NAV and liquidity. Such sales may also accelerate the increase of taxable income to shareholders if these sales result in gains and may also increase transaction costs. In addition, a large redemption could result in the Fund or an Underlying Fund's current expenses being allocated over a smaller asset base, leading to an increase in the Fund or an Underlying Fund's expense ratio. Similarly, large share purchases may adversely affect the Fund or an Underlying Fund's performance to the extent that the Fund or an Underlying Fund is delayed in investing new cash and is required to maintain a larger cash position than it ordinarily would.
- *LIBOR Risk.* The Fund may invest in securities and other instruments whose interest payments are determined by references to the London Interbank Offered Rate ("LIBOR"). According to various reports, certain financial institutions, commencing as early as 2005 and throughout the global financial crisis, routinely made artificially low submissions in the LIBOR setting process, which have subsequently resulted in investigations and fines. These developments may have adversely affected the interest rates on securities whose interest payments were determined by reference to LIBOR. Any future similar developments could, in turn, reduce the value of such securities owned by the Fund.

The United Kingdom Financial Conduct Authority, which regulates LIBOR, announced that after 2021 it will cease its active encouragement of banks to provide the quotations needed to sustain LIBOR. As a result, plans are underway to phase out the use of LIBOR by the end of 2021. Alternatives to LIBOR are in development in many major financial markets. For example, the U.S. Federal Reserve has begun publishing a Secured Overnight Financing Rate (SOFR), a broad measure of secured overnight U.S. Treasury repo rates, as a possible replacement for U.S. dollar LIBOR. The unavailability of LIBOR presents risks to the Fund, including the risk that any pricing or adjustments to the Fund's investments resulting from a substitute or alternate reference rate may adversely affect the Fund's performance and/or NAV. It remains uncertain how such changes would be implemented and the effects such changes would have on the Fund, including any negative effects on the Fund's liquidity and valuation of the Fund's investments, issuers of instruments in which the Fund invests and financial markets generally.

- *Liquidity Risk.* There is risk that the Fund may not be able to pay redemption proceeds within the time periods described in this Prospectus because of unusual market conditions, an unusually high volume of redemption requests, legal restrictions impairing its ability to sell particular securities or close derivative positions at an advantageous market price or other reasons. Certain portfolio securities may be less liquid than others, which may make them difficult or impossible to sell at the time and the price that the Fund would like or difficult to value. The Fund may have to lower the price, sell other securities instead or forgo an investment opportunity. In addition, less liquid securities may be more difficult to value and markets may become less liquid when there are fewer interested buyers or sellers or when dealers are unwilling or unable to make a market for certain securities. Recently, dealers have generally been less willing to make markets for fixed income securities. Any of these events could have a negative effect on fund management or performance. Funds with principal investment strategies that involve investments in securities of companies with smaller market capitalizations, foreign securities, Rule 144A securities, derivatives or securities with substantial market and/or credit risk tend to have the greatest exposure to liquidity risk. In the past, in stressed markets, certain types of mortgage-backed securities suffered periods of illiquidity if disfavored by the market. All of these risks may increase during periods of market turmoil, such as that experienced in 2020 with COVID-19, and could have a negative effect on the Fund's performance.
- *Management Risk.* The net asset value of the Fund changes daily based on the performance of the securities and derivatives in which it invests. The Adviser's judgments about the attractiveness, value and potential appreciation of particular securities and derivatives in which the Fund invests may prove to be incorrect and may not produce the desired results. Management risk includes the risk that the quantitative model used by the Adviser may not perform as expected, particularly in volatile markets. Additionally, the Adviser may have conflicts of interest that could interfere with its management of the Fund's portfolio. For example, the Adviser or its affiliates may manage other investment funds or have other clients that may be similar to, or overlap with, the investment objective and strategy of the Fund, creating potential conflicts of interest when making decisions regarding which investments may be appropriate for the Fund and other clients. Further information regarding conflicts of interest is available in the SAI.
- *Market Events Risk.* There has been increased volatility, depressed valuations, decreased liquidity and heightened uncertainty in the financial markets during the past several years, including what was experienced in 2020. These conditions are an inevitable part of investing in capital markets and may continue, recur, worsen or spread. The U.S. government and the Federal Reserve, as well as certain foreign governments and central banks, have taken steps to support financial markets, including by keeping interest rates at historically low levels. This and other government intervention may not work as intended, particularly if the efforts are perceived by investors as being unlikely to achieve the desired results. The U.S. government and the Federal Reserve may reduce market support activities. Such reduction, including interest rate increases, could negatively affect financial markets generally, increase market volatility and reduce the value and liquidity of securities in which the Fund invests. Policy and legislative changes in the United States and in other countries may also continue to contribute to decreased liquidity and increased volatility in the financial markets. The impact of these changes on the markets, and the practical implications for market participants, may not be fully known for some time.

COVID-19 has resulted in travel restrictions, closed international borders, enhanced health screenings at ports of entry and elsewhere, disruption of and delays in healthcare service preparation and delivery, prolonged quarantines, cancellations, business and school closings, supply chain disruptions, and lower consumer demand, as well as general concern and uncertainty. The impact of COVID-19, and other infectious illness outbreaks that may arise in the future, could adversely affect the economies of many nations or the entire global economy, individual issuers and capital markets in ways that cannot necessarily be foreseen.

- *Market Risk.* Overall market risk may affect the value of individual instruments in which the Fund invests. The Fund is subject to the risk that the securities markets will move down, sometimes rapidly and unpredictably, based on overall economic conditions and other factors, which may negatively affect the Fund's performance. Factors such as domestic and foreign (non-U.S.) economic growth and market conditions, real or perceived adverse economic or political conditions, inflation, changes in interest rate levels, lack of liquidity in the bond or other markets, volatility in the securities markets, adverse investor sentiment affect the securities markets and political events affect the securities markets. Securities markets also may experience long periods of decline in value. When the value of the Fund's investments goes down, your investment in the Fund decreases in value and you could lose money.

Equity securities generally have greater price volatility than fixed income securities, although under certain market conditions fixed income securities may have comparable or greater price volatility. During a general downturn in the securities markets, multiple asset classes may decline in value simultaneously. Adverse market conditions may be prolonged and may not have the same impact on all types of securities. Different sectors of the market and different security types may react differently to such developments. Changes in value may be temporary or may last for extended periods. The Fund may experience a substantial or complete loss on any individual security. Even when securities markets perform well, there is no assurance that the investments held by the Fund will increase in value along with the broader market. Market factors, such as the demand for particular portfolio securities, may cause the price of certain portfolio securities to fall while the prices of other securities rise or remain unchanged.

Local, state, regional, national or global events such as war, acts of terrorism, the spread of infectious illness or other public health issues, recessions, or other events could have a significant impact on the Fund and its investments and could result in decreases to the Fund's net asset value. Political, geopolitical, natural and other events, including war, terrorism, trade disputes, *government* shutdowns, market closures, natural and environmental disasters, epidemics, pandemics and other public health crises and related events and governments' reactions to such events have led, and in the future may lead, to economic uncertainty, decreased economic activity, increased market volatility and other disruptive effects on U.S. and global economies and markets. Such events may have significant adverse direct or indirect effects on the Fund and its investments. For example, a widespread health crisis such as a global pandemic could cause substantial market volatility, exchange trading suspensions and closures, impact the ability to complete redemptions, and affect Fund performance. A health crisis may exacerbate other pre-existing political, social and economic risks. In addition, the increasing interconnectedness of markets around the world may result in many markets being affected by events or conditions in a single country or region or events affecting a single or small number of issuers.

- *Portfolio Turnover Risk.* The Fund may experience high portfolio turnover, including investments made on a shorter-term basis, which may lead to increased Fund expenses that may result in lower investment returns. High portfolio turnover may also result in higher short-term capital gains taxable to shareholders.
- *Preferred Stock Risk.* The value of preferred stocks will fluctuate with changes in interest rates. Typically, a rise in interest rates causes a decline in the value of preferred stock. Preferred stocks are also subject to credit risk, which is the possibility that an issuer of preferred stock will fail to make its dividend payments. Preferred stock prices tend to move more slowly upwards than common stock prices.

Preferred stock is subordinated to any debt the issuer has outstanding. Accordingly, preferred stock dividends are not paid until all debt obligations are first met. Preferred stock may be subject to more fluctuations in market value, due to changes in market participants' perceptions of the issuer's ability to continue to pay dividends, than debt of the same issuer. These investments include convertible preferred stock, which includes an option for the holder to convert the preferred stock into the issuer's common stock under certain conditions, among which may be the specification of a future date when the conversion must begin, a certain number of shares of common stock per share of preferred stock, or a certain price per share for the common stock. Convertible preferred stock tends to be more volatile than non-convertible preferred stock, because its value is related to the price of the issuer's common stock as well as the dividends payable on the preferred stock.

A preferred stock may be considered either debt or equity, depending on the economic characteristics exhibited by such preferred stock.

- *Quantitative Investing Risk.* The Adviser may use proprietary computer trading modeling systems to implement its investment strategies for the Fund. Investments selected using these models may perform differently than the market as a whole or from their expected performance as a result of the factors used in the models, the weight placed on each factor, changes from the factors' historical trends and technical issues in the construction and implementation of the models. There is no assurance that the models are complete or accurate, or representative of future market cycles, nor will they necessarily be beneficial to the Fund if they are accurate. These systems may negatively affect Fund performance for various reasons, including human judgment, inaccuracy of historical data and non-quantitative factors (such as market or trading system dysfunctions, investor fear or over-reaction).
- *Treasury Inflation Protected Securities Risk.* The value of TIPS generally fluctuates in response to inflationary concerns. As inflationary expectations increase, TIPS will become more attractive, because they protect future interest payments against inflation. Conversely, as inflationary concerns decrease, TIPS will become less attractive and less valuable. Although the principal value of TIPS declines in periods of deflation, holders at maturity receive no less than the par value of the bond. However, if the Fund purchases TIPS in the secondary market, where principal values have been adjusted upward due to inflation since issuance, the Fund may experience a loss if there is a subsequent period of deflation. If inflation is lower than expected during the period the Fund holds a TIPS, then the Fund may earn less on the security than on a conventional bond. The U.S. Treasury began issuing TIPS in 1997. As a result, the market for such securities may be less developed or liquid, and more volatile, than certain other securities markets. Although TIPS with different maturities may be issued in the future, the U.S. Treasury currently issues TIPS in five-year, ten-year and twenty-year maturities.

- *Underlying Fund Risk.* The Fund may be subject to the risks of the securities and other instruments described herein both through its own direct investments and indirectly through its investments in Underlying Funds. The Fund's investments in Underlying Funds involve certain additional expenses and certain tax results, which would not be present in a direct investment in the Underlying Funds. The ability of the Fund to meet its investment objective is directly related to the ability of the Underlying Funds to meet their objectives as well as the allocation among those Underlying Funds. The value of the Underlying Funds' investments, and the net asset values of the shares of both the Fund and the Underlying Funds, will fluctuate in response to various market and economic factors related to the securities markets, as well as the financial condition and prospects of issuers in which the Underlying Funds invest. There can be no assurance that the investment objectives of the Underlying Funds will be achieved.
- *U.S. Government Securities Risk.* Treasury obligations may differ in their interest rates, maturities, times of issuance and other characteristics. Obligations of U.S. Government agencies and authorities are supported by varying degrees of credit but generally are not backed by the full faith and credit of the U.S. Government. No assurance can be given that the U.S. Government will provide financial support to its agencies and authorities if it is not obligated by law to do so. In addition, the value of U.S. Government securities may be affected by changes in the credit rating of the U.S. Government.
- *Valuation Risk.* The sale price the Fund could receive for a security may differ from the Fund's valuation of the security, particularly for securities that trade in low volume or volatile markets, or that are valued using a fair value methodology. Because portfolio securities of the Fund may be traded on non-U.S. exchanges, and non-U.S. exchanges may be open on days when the Fund does not price its shares, the value of the securities in the Fund's portfolio may change on days when shareholders will not be able to purchase or sell the Fund's shares.
- *Volatility Risk.* The Fund's investments may appreciate or decrease significantly in value over short periods of time. The value of an investment in the Fund's portfolio may fluctuate due to events or factors that affect industries, sectors or markets generally or that affect a particular investment, industry or sector. The value of an investment in the Fund's portfolio may also be more volatile than the market as a whole. Volatility may affect the Fund's net asset value per share, including by causing it to experience significant increases or declines in value over short periods of time.

Portfolio Holdings Disclosure: A description of the Fund's policies regarding the release of portfolio holdings information is available in the Fund's SAI. Shareholders may request portfolio holdings schedules at no charge by calling 1-877-345-8646.

Cybersecurity

The computer systems, networks and devices used by the Fund and its service providers to carry out routine business operations employ a variety of protections designed to prevent damage or interruption from computer viruses, network failures, computer and telecommunication failures, infiltration by unauthorized persons and security breaches. Despite the various protections utilized by the Fund and its service providers, systems, networks, or devices potentially can be breached. The Fund and its shareholders could be negatively impacted as a result of a cybersecurity breach. The Fund and the Adviser have limited ability to prevent or mitigate cybersecurity incidents affecting third-party Service Providers.

Cybersecurity breaches can include unauthorized access to systems, networks, or devices; infection from computer viruses or other malicious software code; and attacks that shut down, disable, slow, or otherwise disrupt operations, business processes, or website access or functionality. Cybersecurity breaches may cause disruptions and impact the Fund's business operations, potentially resulting in financial losses; interference with the Fund's ability to calculate its NAV; impediments to trading; the inability of the Fund, the Adviser, and other service providers to transact business; prevention of Fund investors from purchasing, redeeming or exchanging shares or receiving distributions; violations of applicable privacy and other laws; regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, or additional compliance costs; as well as the inadvertent release of confidential information.

Similar adverse consequences could result from cybersecurity breaches affecting issuers of securities in which the Fund invests; counterparties with which the Fund engages in transactions; governmental and other regulatory authorities; exchange and other financial market operators, banks, brokers, dealers, insurance companies, and other financial institutions (including financial intermediaries and service providers for the Fund's shareholders); and other parties. In addition, substantial costs may be incurred by these entities in order to prevent any cybersecurity breaches in the future.

Investment by Other Investment Companies

For purposes of the 1940 Act, the Fund is a registered investment company, and the acquisition of the Fund's shares by other investment companies is subject to the restrictions of Section 12(d)(1) thereof. Rule 12d1-4 under the 1940 Act allows a registered investment company to invest in Fund shares beyond the limits of Section 12(d)(1) subject to certain conditions, including that a registered investment company enters into an Investment Agreement with the Trust regarding the terms of the investment. Any investment company considering purchasing shares of the Fund in amounts that would cause it to exceed the restrictions of Section 12(d)(1) should contact the Fund.

MANAGEMENT

Investment Adviser

Holbrook Holdings Inc. (“Holbrook” or the “Adviser”) serves as the investment adviser to the Fund. Its principal place of business is 1032 Windy Elm Drive, Smyrna, GA 30082. Holbrook was founded in December 2015. As of April 30, 2021, the Adviser had approximately \$334 million in assets under management.

Holbrook has entered into an investment advisory agreement with the Fund. Under the agreement, Holbrook receives an annual fee equal to 0.80% of the Fund’s average daily net assets. For the fiscal year ended April 30, 2021, the aggregate fee paid to the Fund’s investment adviser was 0.94% of the Fund’s average daily net assets. In addition to investment advisory fees, the Fund pays other expenses including costs incurred in connection with the maintenance of its securities law registration, printing and mailing prospectuses and SAIs to shareholders, certain financial accounting services, taxes or governmental fees, custodial, transfer and shareholder servicing agent costs, expenses of outside counsel and independent accountants, preparation of shareholder reports and expenses of trustee and shareholders meetings.

Holbrook has contractually agreed to reduce the Fund’s fees and/or to make payments to limit Fund expenses until at least September 1, 2022, so that the total annual operating expenses (exclusive of any front-end or contingent deferred loads, taxes, interest, brokerage commissions, expenses incurred in connection with any merger or reorganization, underlying fund fees and expenses or extraordinary expenses such as litigation) of the Fund do not exceed 1.30% for Class I shares, 1.80% for Investor Class shares and 1.55% for Class A Shares. Waivers and expense payments may be recouped by Holbrook from the Fund, to the extent that overall expenses fall below specified limits, within three years of when the amounts were waived or recouped.

A discussion regarding the basis for the Board of Trustees’ approval of the investment advisory agreement is available in the Fund’s annual shareholder report dated April 30, 2021.

Portfolio Manager

Scott Carmack, Portfolio Manager

Mr. Carmack has served as Chief Executive Officer of the Adviser since 2016. Mr. Carmack has over 18 years of investment management experience. He worked at Leader Capital from 2011 to 2015, serving first as an analyst, then as a portfolio manager and President. Previously, he worked from 2003 to 2010 as a proprietary trader at Evolution, Assent and Chimera Securities. From 2001 to 2003, Mr. Carmack served as an analyst at JP Morgan Private Bank. Mr. Carmack graduated from Harvard University with honors with a degree in economics.

The SAI provides additional information about the Portfolio Manager’s compensation, other accounts managed by the Portfolio Manager, and the Portfolio Manager’s ownership of securities in the Fund.

Changes of Investment Policies

In accordance with Rule 35d-1 under the 1940 Act, the Fund adopted an investment policy that it will, under normal conditions, invest at least 80% of the value of its net assets (plus any borrowings for investment purposes) in the type of investments suggested by the Fund’s name. This requirement is applied at the time of investment. The 80% investment policy of the Fund may be changed at any time by the Board of Trustees. Shareholders will be given written notice at least 60 days prior to any change by the Fund of its 80% investment policy.

HOW SHARES ARE PRICED

The net asset value (“NAV”) and offering price (NAV plus any applicable sales charges) of each class of shares is determined at 4:00 p.m. (Eastern Time) on each day the New York Stock Exchange (“NYSE”) is open for business. NAV is computed by determining, on a per class basis, the aggregate market value of all assets of the Fund, less its liabilities, divided by the total number of shares outstanding ((assets liabilities)/number of shares = NAV). The NYSE is closed on weekends and New Year’s Day, Martin Luther King, P.O. Day, Presidents’ Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. The NAV takes into account, on a per class basis, the expenses and fees of the Fund, including management, administration, and distribution fees, which are accrued daily. The determination of NAV for a share class for a particular day is applicable to all applications for the purchase of shares, as well as all requests for the redemption of shares, received by the Fund (or an authorized broker or agent, or its authorized designee) before the close of trading on the NYSE on that day.

Generally, the Fund's securities listed on an exchange are valued each day at the last quoted sales price on each security's primary exchange. Securities traded or dealt in upon one or more securities exchanges (whether domestic or foreign) for which market quotations are readily available and not subject to restrictions against resale shall be valued at the last quoted sales price on the primary exchange or, in the absence of a sale on the primary exchange, at the mean between the current bid and ask prices on such exchange. Securities primarily traded in the National Association of Securities Dealers' Automated Quotation System ("NASDAQ") National Market System for which market quotations are readily available shall be valued using the NASDAQ Official Closing Price. Securities that are not traded or dealt in any securities exchange (whether domestic or foreign) and for which over-the-counter market quotations are readily available generally shall be valued at the last sale price or, in the absence of a sale, at the mean between the current bid and ask price on such over-the-counter market. Debt securities not traded on an exchange may be valued at prices supplied by a pricing agent(s) based on broker or dealer supplied valuations or matrix pricing, a method of valuing securities by reference to the value of other securities with similar characteristics, such as rating, interest rate and maturity.

In accordance with procedures approved by the Board ("Valuation Procedures"), if market quotations are not readily available or if, in the opinion of the Fund's Adviser, the market quotation that is used to value a security does not represent a readily available market quotation or does not reflect the fair value of the security, the security will be valued at its fair market value ("Fair Valuation") as determined in good faith by a fair value pricing committee. The Board has delegated certain valuation responsibilities to the committee in accordance with the Valuation Procedures. The Valuation Procedures also require Fair Valuation of certain other types of securities, such as illiquid securities. In all of these cases, the Fund's NAV will reflect certain portfolio securities' fair value rather than their market price. Because Fair Valuation involves subjective judgments, Fair Valuation may result in a price materially different from the prices used by other mutual funds to determine net asset value, or from the price that may be realized upon the actual sale of the security. The fair value prices can differ from market prices when they become available or when a price becomes available. The Board has delegated execution of these procedures to a fair value committee composed of one or more officers from each of the (i) Fund's management, (ii) administrator, and (iii) Adviser. The team may also enlist third party consultants such as an audit firm or financial officer of a security issuer on an as-needed basis to assist in determining a security-specific fair value. The Board reviews and considers the determinations reached by the fair value committee in ratifying the fair value committee's application of the fair valuation methodologies employed.

The Fund may use independent pricing services to assist in calculating the fair market value of the Fund's securities. In addition, market prices for foreign securities are not determined at the same time of day as the NAV for the Fund. Because the Fund or an Underlying Fund may hold portfolio securities primarily listed on foreign exchanges, and these exchanges may trade on weekends or other days when the Fund or an Underlying Fund does not price its shares, the value of some of the Fund's portfolio securities may change on days when you may not be able to buy or sell Fund shares. In computing the NAV, the Fund values foreign securities held by the Fund at the latest closing price on the exchange in which they are traded immediately prior to closing of the NYSE. Prices of foreign securities quoted in foreign currencies are translated into U.S. dollars at current rates. If events materially affecting the value of a security in the Fund's portfolio, particularly foreign securities, occur after the close of trading on a foreign market but before the Fund prices its shares, the security will be valued at fair value. For example, if trading in a portfolio security is halted and does not resume before the Fund calculates its NAV, the Adviser may need to price the security using the Fund's fair value pricing guidelines. Without a fair value price, short-term traders could take advantage of the arbitrage opportunity and dilute the NAV of long-term investors. Fair Valuation of the Fund's portfolio securities can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that fair value pricing policies will prevent dilution of the Fund's NAV by short-term traders.

With respect to any portion of the Fund's assets that are invested in one or more open-end management investment companies registered under the 1940 Act, the Fund's net asset value is calculated based upon the net asset values of those open-end management investment companies, and the prospectuses for these companies explain the circumstances under which those companies will use fair value pricing and the effects of using fair value pricing.

The shares of many closed-end investment companies, after their initial public offering, frequently trade at a price per share that is different than the net asset value per share. The difference represents a market premium or market discount of such shares. There can be no assurances that the market discount or premium on shares of any closed-end investment company purchased by the Fund will not change.

HOW TO PURCHASE SHARES

Share Classes: This Prospectus describes three classes of shares offered by the Fund: Class I shares, Investor Class shares and Class A Shares. The Fund offers these three classes of shares so that you can choose the class that best suits your investment needs. Refer to the information below to help you make your investment decision. The main differences between each class are ongoing fees and minimum investments. In choosing which class of shares to purchase, you should consider which will be most beneficial to you, given the amount of your purchase and the length of time you expect to hold the shares. For information on ongoing distribution fees, see the section entitled **Distribution Fees** in this Prospectus. Each class of shares in the Fund represents interest in the same portfolio of investments within the Fund. There is no investment minimum on reinvested distributions, and the Fund may change investment minimums at any time. The Fund and the Adviser may each waive investment minimums at their individual discretion. All share classes may not be available for purchase in all states.

Class I shares: Class I shares of the Fund are sold at NAV without an initial sales charge and are not subject to 12b-1 distribution fees, but have a higher minimum initial investment than Investor Class shares. This means that 100% of your initial investment is placed into shares of the Fund. Class I shares require a minimum initial investment of \$100,000 and the minimum subsequent investment is \$500.

Class I shares are available to certain institutional investors, and directly to certain individual investors as set forth below:

- Institutional Investors may include, but are not limited to, corporations, retirement plans, foundations/endowments and investors who purchase through a wrap account offered through a selling group member that enters into a wrap fee program agreement with the Distributor.
- Individual Investors include trustees, officers and employees of the Trust and its affiliates, and immediate family members of all such persons.
- Clients of the Adviser.

For accounts sold through financial intermediaries, it is the primary responsibility of the financial intermediary to ensure compliance with eligibility requirements such as investor type and investment minimums.

Investor Class Shares: Investor Class shares of the Fund are sold at NAV without an initial sales charge. This means that 100% of your initial investment is placed into shares of the Fund. Under the Fund’s distribution and services plan adopted pursuant to Rule 12b-1 under the 1940 Act, Investor Class shares pay up to 0.50% on an annualized basis of the average daily net assets as reimbursement or compensation for service and distribution-related activities with respect to the Fund and/or shareholder services. Over time, fees paid under this distribution and service plan will increase the cost of an Investor Class shareholder’s investment and may cost more than other types of sales charges. The minimum initial investment in Investor Class shares of the Fund is \$2,500. The minimum subsequent investment in Investor Class shares of the Fund is \$100.

Class A Shares: Class A shares are offered at their public offering price, which is NAV plus the applicable sales charge and is subject to 12b-1 distribution fees of up to 0.25% of the average daily net assets of Class A shares. The minimum initial investment in Class A shares of the Fund is \$2,500 for all accounts. The minimum subsequent investment in Class A shares of the Fund is \$100 for all accounts. The sales charge varies, depending on how much you invest. There are no sales charges on reinvested distributions. The following sales charges, which may be waived in the Adviser’s discretion, apply to your purchases of Class A shares of the Fund:

Amount Invested	Sales Charge as a % of Offering Price ⁽¹⁾	Sales Charge as a % of Amount Invested	Dealer Reallowance
Under \$100,000	1.25%	1.27%	1.00%
\$100,000 to \$249,999	0.75%	0.76%	0.50%
\$250,000 and above	None	None	None

(1) Offering price includes the front-end sales load. The sales charge you pay may differ slightly from the amount set forth above because of rounding that occurs in the calculation used to determine your sales charge.

How to Reduce Your Sales Charge

You may be eligible to purchase Class A shares at a reduced sales charge. To qualify for these reductions, you must notify the Fund’s distributor, Northern Lights Distributors, LLC (the “Distributor”), in writing and supply your account number at the time of purchase. You may combine your purchase with those of your “immediate family” (your spouse and your children under the age of 21) for purposes of determining eligibility. If applicable, you will need to provide the account numbers of your spouse and your minor children as well as the ages of your minor children.

Rights of Accumulation: To qualify for the lower sales charge rates that apply to larger purchases of Class A shares, you may combine your new purchases of Class A shares with Class A shares of the Fund that you already own. The applicable initial sales charge for the new purchase is based on the total of your current purchase and the current value of all other Class A shares that you own. The reduced sales charge will apply only to current purchases and must be requested in writing when you buy your shares.

Shares of the Fund are held as follows and cannot be combined with your current purchase for purposes of reduced sales charges:

- Shares held indirectly through financial intermediaries other than your current purchase broker-dealer (for example, a different broker-dealer, a bank, a separate insurance company account or an investment advisor);
- Shares held through an administrator or trustee/custodian of an Employer Sponsored Retirement Plan (for example, a 401(k) plan) other than employer-sponsored IRAs;
- Shares held directly in the Fund account on which the broker-dealer (financial advisor) of record is different than your current purchase broker-dealer.

Letter of Intent: Under a Letter of Intent (“LOI”), you commit to purchase a specified dollar amount of Class A shares of the Fund, with a minimum of \$25,000, during a 13-month period. At your written request, Class A share purchases made during the previous 90 days may be included. The amount you agree to purchase determines the initial sales charge you pay. If the full-face amount of the LOI is not invested by the end of the 13-month period, your account will be adjusted to the higher initial sales charge level for the amount actually invested. You are not legally bound by the terms of your LOI to purchase the amount of your shares stated in the LOI. The LOI does, however, authorize the Fund to hold in escrow 5% of the total amount you intend to purchase. If you do not complete the total intended purchase at the end of the 13-month period, the Fund’s transfer agent will redeem the necessary portion of the escrowed shares to make up the difference between the reduced rate sales charge (based on the amount you intended to purchase) and the sales charge that would normally apply (based on the actual amount you purchased).

Repurchase of Class A Shares: If you have redeemed Class A shares of the Fund within the past 120 days, you may repurchase an equivalent amount of Class A shares of the Fund at NAV, without the normal front-end sales charge. In effect, this allows you to reacquire shares that you may have had to redeem, without repaying the front-end sales charge. You may exercise this privilege only once and must notify the Fund that you intend to do so in writing. The Fund must receive your purchase order within 120 days of your redemption. Note that if you reacquire shares through separate installments (e.g., through monthly or quarterly repurchases), the sales charge waiver will only apply to those portions of your repurchase order received within 120 days of your redemption.

Sales Charge Waivers

The sales charge on purchases of Class A shares is waived for certain types of investors, including:

- Current and retired directors and officers of any Fund sponsored by the Adviser or any of their subsidiaries, their families (e.g., spouse, children, mother or father).
- Employees of the Adviser and their families, or any full-time employee or registered representative of the Distributor or of broker-dealers having dealer agreements with the Distributor (a “Selling Broker”) and their immediate families (or any trust, pension, profit sharing or other benefit plan for the benefit of such persons).
- Any full-time employee of a bank, savings and loan, credit union or other financial institution that utilizes a Selling Broker to clear purchases of the Fund’s shares and their immediate families.
- Participants in certain “wrap-fee” or asset allocation programs or other fee-based arrangements sponsored by broker-dealers and other financial institutions that have entered into agreements with the Distributor.
- Clients of financial intermediaries that have entered into arrangements with the Distributor providing for the shares to be used in particular investment products made available to such clients and for which such registered investment advisers may charge a separate fee.
- Institutional investors (which may include bank trust departments and registered investment advisers).
- Any accounts established on behalf of registered investment advisers or their clients by broker-dealers that charge a transaction fee and that have entered into agreements with the Distributor.
- Separate accounts used to fund certain unregistered variable annuity contracts or Section 403(b) or 401(a) or (k) accounts.
- Employer-sponsored retirement or benefit plans with total plan assets in excess of \$5 million where the plan’s investments in the Fund are part of an omnibus account. A minimum initial investment of \$1 million in the Fund is required. The Distributor in its sole discretion may waive these minimum dollar requirements.
- Any government entity that is prohibited from paying a sales charge or commission to purchase mutual fund shares.
- Any purchases by clients of the Adviser or purchases referred through the Adviser.

The Fund does not waive sales charges for the reinvestment of proceeds from the sale of shares of a different fund where those shares were subject to a front-end sales charge (sometimes called an “NAV transfer”). Whether a sales charge waiver is available for your retirement plan or charitable account depends upon the policies and procedures of your intermediary. Please consult your financial adviser for further information.

Factors to Consider When Choosing a Share Class: When deciding which class of shares to purchase, you should consider your investment goals, present and future amounts you may invest in the Fund, and the length of time you intend to hold your shares. To help you make a determination as to which class of shares to buy, please refer back to the examples of the Fund’s expenses over time in the **Fees and Expenses of the Fund** section for the Fund in this Prospectus. You also may wish to consult with your financial adviser for advice with regard to which share class would be most appropriate for you.

Purchasing Shares: You may purchase shares of the Fund by sending a completed application form (the “Application”) to the following address:

Regular/Express

Holbrook Income Fund
c/o Gemini Fund Services, LLC
P.O. Box 541150
Omaha, NE 68154

Overnight Mail

Holbrook Income Fund
c/o Gemini Fund Services, LLC
4221 North 203rd Street, Ste. 100
Elkhorn, Nebraska 68022-3474

The USA PATRIOT Act requires financial institutions, including the Fund, to adopt certain policies and programs to prevent money-laundering activities, including procedures to verify the identity of customers opening new accounts. As requested on the Application, you should supply your full name, date of birth, social security number and permanent street address. Mailing addresses containing a P.O. Box will not be accepted. This information will assist the Fund in verifying your identity. Until such verification is made, the Fund may temporarily limit additional share purchases. In addition, the Fund may limit additional share purchases or close an account if it is unable to verify a shareholder’s identity. As required by law, the Fund may employ various procedures, such as comparing the information to fraud databases or requesting additional information or documentation from you, to ensure that the information supplied by you is correct.

Purchase through Brokers: You may invest in the Fund through brokers or agents who have entered into selling agreements with the Fund’s distributor. The brokers and agents are authorized to receive purchase and redemption orders on behalf of the Fund. Such brokers are authorized to designate other intermediaries to receive purchase and redemption orders on the Fund’s behalf. The Fund will be deemed to have received a purchase or redemption order when an authorized broker or its designee receives the order. The broker or agent may set their own initial and subsequent investment minimums. You may be charged a fee if you use a broker or agent to buy or redeem shares of the Fund. Finally, various servicing agents use procedures and impose restrictions that may be in addition to, or different from those applicable to investors purchasing shares directly from the Fund. You should carefully read the program materials provided to you by your servicing agent.

Purchase by Wire: If you wish to wire money to make an investment in the Fund, please call the Fund at 1-877-345-8646 for wiring instructions and to notify the Fund that a wire transfer is coming. Any commercial bank can transfer same-day funds via wire. The Fund will normally accept wired funds for investment on the day received if they are received by the Fund’s designated bank before the close of regular trading on the NYSE. Your bank may charge you a fee for wiring same-day funds.

Automatic Investment Plan: You may participate in the Fund’s Automatic Investment Plan, an investment plan that automatically moves money from your bank account and invests it in the Fund through the use of electronic funds transfers or automatic bank drafts. You may elect to make subsequent investments by transfers of a minimum of \$500 for I Shares or \$100 for Investor Shares on specified days of each month into your established Fund account. Please contact the Fund at 1-877-345-8646 for more information about the Fund’s Automatic Investment Plan.

Minimum and Additional Investment Amounts: The minimum initial investment in Class I shares is \$100,000. The minimum initial investment in Investor Class shares is \$2,500. The minimum additional investment for Class I shares is \$500 and \$100 for Investor Class shares. The minimum initial investment in Class A shares is \$2,500. The minimum initial investment in Class A shares is \$100. There is no minimum investment requirement when you are buying shares by reinvesting dividends and distributions from the Fund. The Fund reserves the right to waive any investment minimum requirement.

The Fund, however, reserves the right, in its sole discretion, to reject any application to purchase shares. Applications will not be accepted unless they are accompanied by a check drawn on a U.S. bank, thrift institutions, or credit union in U.S. funds for the full amount of the shares to be purchased. After you open an account, you may purchase additional shares by sending a check together with written instructions stating the name(s) on the account and the account number, to the above address. Make all checks payable to the Fund. The Fund will not accept payment in cash, including cashier’s checks or money orders. Also, to prevent check fraud, the Fund will not accept credit cards or third-party checks, U.S. Treasury checks, credit card checks or starter checks for the purchase of shares.

Note: Gemini Fund Services, LLC, the Fund’s transfer agent, will charge a \$25 fee against a shareholder’s account, in addition to any loss sustained by the Fund, for any check returned to the transfer agent for insufficient funds.

When Order is Processed: All shares will be purchased at the NAV per share (plus applicable sales charges, if any) next determined after the Fund receives your application or request in good order. All requests received in good order by the Fund before 4:00 p.m. (Eastern Time) will be processed on that same day. Requests received after 4:00 p.m. (Eastern Time) will be processed on the next business day.

Good Order: When making a purchase request, make sure your request is in good order. “Good order” means your purchase request includes:

- the name of the Fund;
- the dollar amount of shares to be purchased;
- a completed purchase application or investment stub; and
- check payable to the “Holbrook Income Fund.”

Retirement Plans: You may purchase shares of the Fund for your individual retirement plans. Please call the Fund at 1-877-345-8646 for the most current listing and appropriate disclosure documentation on how to open a retirement account.

HOW TO REDEEM SHARES

Redeeming Shares: You may redeem all or any portion of the shares credited to your account by submitting a written request for redemption to:

Regular/Express

Holbrook Income Fund
c/o Gemini Fund Services, LLC
P.O. Box 541150
Omaha, NE 68154

Overnight Mail

Holbrook Income Fund
c/o Gemini Fund Services, LLC
4221 North 203rd Street, Ste. 100
Elkhorn, Nebraska 68022-3474

Redemptions by Telephone: The telephone redemption privilege is automatically available to all new accounts except retirement accounts. If you do not want the telephone redemption privilege, you must indicate this in the appropriate area on your account application or you must write to the Fund and instruct it to remove this privilege from your account. The proceeds, which are equal to number of shares times NAV, will be sent by mail to the address designated on your account or sent electronically, via ACH or wire, directly to your existing account in a bank or brokerage firm in the United States as designated on your application. To redeem by telephone, call 1-877-345-8646. The redemption proceeds normally will be sent by mail or electronically within three business days after receipt of your telephone instructions. IRA accounts are not redeemable by telephone.

The Fund reserves the right to suspend the telephone redemption privileges with respect to your account if the name(s) or the address on the account has been changed within the previous 30 days. Neither the Fund, the transfer agent, nor their respective affiliates will be liable for complying with telephone instructions they reasonably believe to be genuine or for any loss, damage, cost or expenses in acting on such telephone instructions and you will be required to bear the risk of any such loss. The Fund or the transfer agent, or both, will employ reasonable procedures to determine that telephone instructions are genuine. If the Fund and/or the transfer agent do not employ these procedures, they may be liable to you for losses due to unauthorized or fraudulent instructions. These procedures may include, among others, requiring forms of personal identification prior to acting upon telephone instructions, providing written confirmation of the transactions and/or tape recording telephone instructions.

Redemptions through Broker: If shares of the Fund are held by a broker-dealer, financial institution or other servicing agent, you must contact that servicing agent to redeem shares of the Fund. The servicing agent may charge a fee for this service.

Redemptions by Wire: You may request that your redemption proceeds be wired directly to your bank account. The Fund’s transfer agent imposes a \$15 fee for each wire redemption and deducts the fee directly from your account. Your bank may also impose a fee for the incoming wire.

Automatic Withdrawal Plan: If your individual account, IRA or other qualified plan account has a current account value of at least \$10,000, you may participate in the Fund's Automatic Withdrawal Plan, an investment plan that automatically moves money to your bank account from the Fund through the use of electronic funds transfers. You may elect to make subsequent withdrawals by transfers of a minimum of \$500 for I Shares or \$100 for Investor Shares on specified days of each month into your established bank account. Please contact the Fund at 1-877-345-8646 for more information about the Fund's Automatic Withdrawal Plan.

Redemptions in Kind: It is expected that payment of redemption proceeds will normally be made from uninvested cash or short-term investments or proceeds from the sale of portfolio securities. It is possible that stressed market conditions or large shareholder redemptions may result in the need for utilization of the Fund's ability to redeem in kind in order to meet shareholder redemption requests. The Fund reserves the right to honor requests for redemption or repurchase orders made by a shareholder during any 90-day period by making payment in whole or in part in portfolio securities ("redemption in kind") if the amount of such a request is large enough to affect operations (if the request is greater than the lesser of \$250,000 or 1% of the Fund's net assets at the beginning of the 90-day period). The securities will be chosen by the Fund and valued using the same procedures as used in calculating the Fund's NAV. A shareholder may incur transaction expenses in converting these securities to cash.

When Redemptions are Sent: Once the Fund receives your redemption request in "good order" as described below, it will issue a check based on the next determined NAV following your redemption request. The redemption proceeds normally will be sent by mail or by wire within three business days after receipt of a request in "good order." If you purchase shares using a check and soon after request a redemption, your redemption proceeds will not be sent until the check used for your purchase has cleared your bank.

Good Order: Your redemption request will be processed if it is in "good order." To be in good order, the following conditions must be satisfied:

- The request should be in writing, unless redeeming by telephone, indicating the number of shares or dollar amount to be redeemed;
- The request must identify your account number;
- The request should be signed by you and any other person listed on the account, exactly as the shares are registered; and
- If you request that the redemption proceeds be sent to a person, bank or an address other than that of record or paid to someone other than the record owner(s), or if the address was changed within the last 30 days, or if the proceeds of a requested redemption exceed \$50,000, the signature(s) on the request must be medallion signature guaranteed by an eligible signature guarantor.

When You Need Medallion Signature Guarantees: If you wish to change the bank or brokerage account that you have designated on your account, you may do so at any time by writing to the Fund with your signature guaranteed. A medallion signature guarantee assures that a signature is genuine and protects you from unauthorized account transfers. You will need your signature guaranteed if:

- you request a redemption to be made payable to a person not on record with the Fund;
- you request that a redemption be mailed to an address other than that on record with the Fund;
- the proceeds of a requested redemption exceed \$50,000;
- any redemption is transmitted by federal wire transfer to a bank other than the bank of record; or
- your address was changed within 30 days of your redemption request.

Signatures may be guaranteed by any eligible guarantor institution (including banks, brokers and dealers, credit unions, national securities exchanges, registered securities associations, clearing agencies and savings associations). Further documentation will be required to change the designated account if shares are held by a corporation, fiduciary or other organization. *A notary public cannot guarantee signatures.*

Retirement Plans: If you own shares of the Fund through an IRA or other retirement plan, you must indicate on your redemption request whether the Fund should withhold federal income tax. Unless you elect in your redemption request that you do not want to have federal tax withheld, the redemption will be subject to withholding.

Low Balances: If at any time your account balance falls below \$2,000 (\$1,000 for retirement accounts), the Fund may notify you that, unless the account is brought up to at least \$2,000 (\$1,000 for retirement accounts) within 30 days of the notice, your account could be closed. After the notice period, the Fund may redeem all of your shares and close your account by sending you a check to the address of record. Your account will not be closed if the account balance drops below \$2,000 (\$1,000 for retirement accounts) due to a decline in NAV.

FREQUENT PURCHASES AND REDEMPTIONS OF FUND SHARES

The Fund discourages and does not accommodate market timing. Frequent trading into and out of the Fund can harm all Fund shareholders by disrupting the Fund's investment strategies, increasing Fund expenses, decreasing tax efficiency and diluting the value of shares held by long-term shareholders. The Fund is designed for long-term investors and is not intended for market timing or other disruptive trading activities. Accordingly, the Fund's Board has approved policies that seek to curb these disruptive activities while recognizing that shareholders may have a legitimate need to adjust their Fund investments as their financial needs or circumstances change. The Fund currently uses several methods to reduce the risk of market timing. These methods include:

- Committing staff to review, on a continuing basis, recent trading activity in order to identify trading activity that may be contrary to the Fund's "Market Timing Trading Policy;"
- Rejecting or limiting specific purchase requests; and
- Rejecting purchase requests from certain investors.

Though these methods involve judgments that are inherently subjective and involve some selectivity in their application, the Fund seeks to make judgments and applications that are consistent with the interests of the Fund's shareholders.

Based on the frequency of redemptions in your account, the Adviser or transfer agent may in its sole discretion determine that your trading activity is detrimental to the Fund as described in the Fund's Market Timing Trading Policy and elect to (i) reject or limit the amount, number, frequency or method for requesting future purchases into the Fund and/or (ii) reject or limit the amount, number, frequency or method for requesting future exchanges or redemptions out of the Fund.

The Fund reserves the right to reject or restrict purchase requests for any reason, particularly when the shareholder's trading activity suggests that the shareholder may be engaged in market timing or other disruptive trading activities. Neither the Fund nor the Adviser will be liable for any losses resulting from rejected purchase orders. The Adviser may also bar an investor who has violated these policies (and the investor's financial advisor) from opening new accounts with the Fund.

Although the Fund attempts to limit disruptive trading activities, some investors use a variety of strategies to hide their identities and their trading practices. There can be no guarantee that the Fund will be able to identify or limit these activities. Omnibus account arrangements are common forms of holding shares of the Fund. While the Fund will encourage financial intermediaries to apply the Fund's Market Timing Trading Policy to their customers who invest indirectly in the Fund, the Fund is limited in its ability to monitor the trading activity or enforce the Fund's Market Timing Trading Policy with respect to customers of financial intermediaries. For example, should it occur, the Fund may not be able to detect market timing that may be facilitated by financial intermediaries or made difficult to identify in the omnibus accounts used by those intermediaries for aggregated purchases, exchanges and redemptions on behalf of all their customers. More specifically, unless the financial intermediaries have the ability to apply the Fund's Market Timing Trading Policy to their customers through such methods as implementing short-term trading limitations or restrictions and monitoring trading activity for what might be market timing, the Fund may not be able to determine whether trading by customers of financial intermediaries is contrary to the Fund's Market Timing Trading Policy. Brokers maintaining omnibus accounts with the Fund have agreed to provide shareholder transaction information to the extent known to the broker to the Fund upon request. If the Fund, its transfer agent or shareholder servicing agent suspects there is market timing activity in the account, the Fund will seek full cooperation from the service provider maintaining the account to identify the underlying participant. At the request of the Adviser, the service providers may take immediate action to stop any further short-term trading by such participants.

TAX STATUS, DIVIDENDS AND DISTRIBUTIONS

The Fund intends to distribute substantially all of its net investment income monthly and net capital gains annually. Both types of distributions will be reinvested in shares of the Fund unless you elect to receive cash. Dividends from net investment income (including any excess of net short-term capital gain over net long-term capital loss) are taxable to investors as ordinary income, except that the Fund's dividends attributable to its "qualified dividend income" (i.e., dividends received on stock of most domestic and certain foreign corporations with respect to which the Fund satisfies certain holding period and other restrictions), if any, generally are subject to federal income tax for non-corporate shareholders who satisfy those restrictions with respect to their Fund shares at the rate for net capital gain -- a maximum of 20%. Distributions of net capital gain (the excess of net long-term capital gain over net short-term capital loss) are generally taxable as long-term capital gain, regardless of your holding period for the shares. Any dividends or capital gain distributions you receive from the Fund will normally be taxable to you when made, regardless of whether you reinvest dividends or capital gain distributions or receive them in cash. Certain dividends or distributions declared in October, November or December will be taxed to shareholders as if received in December if they are paid during the following January. Each year the Fund will inform you of the amount and type of your distributions.

When you redeem, sell or exchange Fund shares, you will generally realize a taxable gain or loss (unless you are a tax-exempt investor or your investment is in a qualified retirement account). This gain or loss is measured by the difference between the proceeds of the sale and the tax basis for the shares you sold. (To aid in computing your tax basis, you generally should retain your account statements for the period that you hold shares in the Fund.) The Fund (or its administrative agent) is required to report to the Internal Revenue Service ("IRS") and furnish to shareholders the cost basis information for sale transactions of shares.

An additional 3.8% Medicare tax will be imposed on certain net investment income (including ordinary dividends and capital gain distributions received from the Fund and net gains from redemptions or other taxable dispositions of Fund shares) of U.S. individuals, estates and trusts to the extent that such person's "modified adjusted gross income" (in the case of an individual) or "adjusted gross income" (in the case of an estate or trust) exceeds a threshold amount.

On the account application, you will be asked to certify that your social security number or taxpayer identification number is correct and that you are not subject to backup withholding for failing to report income to the IRS. If you are subject to backup withholding or you did not certify your taxpayer identification number, the IRS requires the Fund to withhold a percentage of any dividend, redemption or exchange proceeds (currently, at a rate of 24%). The Fund reserves the right to reject any application that does not include a certified social security or other taxpayer identification number. If you do not have a social security number, you should indicate on the purchase form that your application to obtain a social security number is pending. The Fund may be required to withhold taxes if a taxpayer identification number is not delivered to the Fund within seven days.

The foregoing is only a brief summary of certain U.S. federal income tax consequences of investing in the Fund. This summary is not intended to be and should not be construed to be legal or tax advice. You should consult your own tax advisers to determine the tax consequences of owning the Fund's shares. See "Tax Status" in the Fund's SAI for more information.

DISTRIBUTION OF SHARES

Distributor: Northern Lights Distributors, LLC, 4221 North 203rd Street, Ste. 100, Elkhorn, Nebraska 68022-3474, is the distributor for the shares of the Fund. Northern Lights Distributors, LLC is a registered broker-dealer and member of the Financial Industry Regulatory Authority, Inc. ("FINRA"). Shares of the Fund are offered on a continuous basis.

Distribution Fees: Investor Class shares has adopted a Distribution Plan ("12b-1 Plan" or "Plan"), pursuant to which the Fund may pay the Distributor an annual fee for distribution and shareholder servicing expenses of up to 0.50% of the Fund's average daily net assets attributable to Investor Class shares. Class A shares have adopted a Distribution Plan ("12b-1 Plan" or "Plan"), pursuant to which the Fund may pay the Distributor an annual fee for distribution and shareholder servicing expenses of up to 0.25% of the Fund's average daily net assets attributable to Class A shares.

The Distributor and other entities are paid under the Plan for services provided and the expenses borne by the Distributor and others in the distribution of Fund shares, including the payment of commissions for sales of the shares and incentive compensation to and expenses of dealers and others who engage in or support distribution of shares or who service shareholder accounts, including overhead and telephone expenses; printing and distribution of prospectuses and reports used in connection with the offering of the Fund's shares to other than current shareholders; and preparation, printing and distribution of sales literature and advertising materials. In addition, the Distributor or other entities may utilize fees paid pursuant to the Plan to compensate dealers or other entities for their opportunity costs in advancing such amounts, which compensation would be in the form of a carrying charge on any un-reimbursed expenses.

You should be aware that if you hold your shares for a substantial period of time, you may indirectly pay more than the economic equivalent of the maximum front-end sales charge allowed by FINRA due to the recurring nature of distribution (12b-1) fees.

Additional Compensation to Financial Intermediaries: The Distributor, its affiliates, and the Fund's Adviser may, at their own expense and out of their own legitimate profits, provide additional cash payments to financial intermediaries who sell shares of the Fund, including affiliates of the Adviser. Financial intermediaries include brokers, financial planners, banks, insurance companies, retirement or 401(k) plan administrators and others. These payments may be in addition to the Rule 12b-1 fees and any sales charges that are disclosed elsewhere in this Prospectus. These payments are generally made to financial intermediaries that provide shareholder or administrative services, or marketing support. Marketing support may include access to sales meetings, sales representatives and financial intermediary management representatives, inclusion of the Fund on a sales list, including a preferred or select sales list, or other sales programs. These payments also may be made as an expense reimbursement in cases where the financial intermediary provides shareholder services to Fund shareholders. The Distributor may, from time to time, provide promotional incentives, including reallowance and/or payment of up to the entire sales charge, to certain investment firms. Such incentives may, at the Distributor's discretion, be limited to investment firms who allow their individual selling representatives to participate in such additional commissions.

Householding: To reduce expenses, the Fund mails only one copy of the Prospectus and each annual and semi-annual report (or, if applicable, each notice of electronic accessibility thereof) to those addresses shared by two or more accounts. If you wish to receive individual copies of these documents, please call the Fund at 1-877-345-8646 on days the Fund is open for business or contact your financial institution. The Fund will begin sending you individual copies thirty days after receiving your request.

FINANCIAL HIGHLIGHTS

The financial highlights table is intended to help you understand the Fund's financial performance for the period of the Fund's operations. Certain information reflects financial results for a single Fund share. The total return in the table represents the rate that an investor would have earned (or lost) on an investment in the Fund (assuming reinvestment of all dividends and distributions). The information for the years ended April 30, 2021, April 30, 2020, April 30, 2019, April 30, 2018 and for the period ended April 30, 2017 has been derived from financial statements audited by Grant Thornton LLP, whose report, along with the Fund's financial statements, is included in the Fund's annual report, which is available upon request and is incorporated by reference in the SAI.

Per Share Data and Ratios for a Share of Beneficial Interest Outstanding Throughout each Year/Period

	Year Ended April 30, 2021	Year Ended April 30, 2020	Year Ended April 30, 2019	Year Ended April 30, 2018	Period Ended April 30, 2017⁽¹⁾
Net asset value, beginning of year/period	\$ 8.91	\$ 10.13	\$ 10.18	\$ 10.15	\$ 10.00
Activity from investment operations:					
Net investment income ⁽²⁾	0.51	0.37	0.38	0.41	0.25
Net realized and unrealized gain (loss) on investments	1.86	(1.20)	(0.01)	(0.02) ⁽⁹⁾	0.15
Total from investment operations	2.37	(0.83)	0.37	0.39	0.40
Less distributions from:					
Net investment income	(0.61)	(0.39)	(0.39)	(0.36)	(0.25)
Net realized gains	—	—	(0.03)	(0.00)*	—
Total distributions	(0.61)	(0.39)	(0.42)	(0.36)	(0.25)
Net asset value, end of year/period	\$ 10.67	\$ 8.91	\$ 10.13	\$ 10.18	\$ 10.15
Total return ⁽³⁾	27.10% ⁽¹⁰⁾	(8.45)% ⁽¹⁰⁾	3.66%	4.00%	4.03% ⁽⁴⁾
Net assets, at end of year/period (000s)	\$ 267,123	\$ 97,721	\$ 40,723	\$ 13,956	\$ 262
Ratio of gross expenses to average net assets ^(5,7)	1.13%	1.16%	1.66%	4.39%	91.70% ⁽⁶⁾
Ratio of net expenses to average net assets ⁽⁷⁾	1.28% ⁽¹¹⁾	1.30% ⁽¹¹⁾	1.30%	1.30%	1.30% ⁽⁶⁾
Ratio of net investment income to average net assets ^(7,8)	4.98%	3.76%	3.78%	4.02%	3.11% ⁽⁶⁾
Portfolio Turnover Rate	74%	106%	78%	138%	109% ⁽⁴⁾

(1) Fund commenced investment operations on July 6, 2016.

(2) The net investment income per share data was determined using the average shares outstanding throughout each year/period.

(3) Total returns are historical in nature and assume changes in share price, reinvestment of dividends and capital gains distributions, if any. Had the Advisor not absorbed a portion of Fund expenses, total returns would have been lower.

(4) Not Annualized.

(5) Represents the ratio of expenses to average net assets absent fee waivers and/or expense reimbursements by the Advisor.

(6) Annualized.

(7) Does not include expenses of other investment companies in which the Fund invests.

(8) Recognition of net investment income by the Fund is affected by the timing of declaration of dividends by underlying investment companies in which the Fund invests.

(9) Realized and unrealized gains per share in this caption are balancing amounts necessary to reconcile the change in net asset value per share and may not reconcile with the aggregate gains and losses in the statement of operations due to the timing of share transactions.

(10) Includes adjustments in accordance with accounting principles generally accepted in the United States and, consequently, the net asset values for financial reporting purposes and the returns based upon those net asset values may differ from the net asset values and returns for shareholder transactions. Adjustments may apply to some but not all years and classes.

(11) Inclusive of Advisor's recapture of waived/reimbursed fees from prior periods.

* Per share amount represents less than \$0.01 per share.
